Less Is Enough On Architecture And Asceticism:

Less Is Enough Pier Vittorio Aureli, 2013 **This Thing Called Theory** Teresa Stoppani, Giorgio Ponzio, George Themistokleous, 2016-11-10 22 White wide and scattered picturing her housing career 23 Toward a theory of Interior 24 Repositioning Theory now Don't excavate change reality Part VII Forms of engagement 25 Unpolitical 26 Prince complex narcissism and reproduction of the architectural mirror 27 Less than enough a critique of Aureli's project 28 Repositioning Having ideas 29 Post scriptum But that is not enough Index [Architecture for the Commons](#) Jose Sanchez, 2020-08-04 Architecture for the Commons dives into an analysis of how the tectonics of a building is fundamentally linked to the economic organizations that allow them to exist By tracing the origins and promises of current technological practices in design the book provides an alternative path one that reconsiders the means of achieving complexity through combinatorial strategies This move requires reconsidering serial production with crowdsourcing and user content in mind The ideas presented will be explored through the design research developed within Plethora Project a design practice that explores the use of video game interfaces as a mechanism for participation and user design The research work presented throughout the book seeks to align with a larger project that is currently taking place in many different fields The Construction of the Commons By developing both the ideological and physical infrastructure the project of the Commons has become an antidote to current economic practices that perpetuate inequality The mechanisms of the production and governance of the Commons are discussed inviting the reader to get involved and participate in the discussion The current political and economic landscape calls for a reformulation of our current economic practices and alternative value systems that challenge the current market monopolies This book will be of great interest not only to architects and designers studying the impact of digital technologies in the field of design but also to researchers studying novel techniques for social participation and cooperating of communities through digital networks The book connects principles of architecture economics and social sciences to provide alternatives to the current production trends *The Routledge Companion to Critical Approaches to Contemporary Architecture* Swati Chattopadhyay, Jeremy White, 2019-08-01 The Routledge Companion to Critical Approaches to Contemporary Architecture convenes a wide array of critical voices from architecture art history urbanism geography anthropology media and performance studies computer science bio engineering environmental studies and sociology that help us understand the meaning and significance of global architecture of the twenty first century New chapters by 36 contributors illustrated with over 140 black and white images are assembled in six parts concerning both real and virtual spaces design materiality alterity technologies cityscapes and practice **Nelson Goodman and Modern Architecture** Kasper Lægring, 2024-07-19 This book orchestrates a convergence of two discourses from the 1960s Nelson Goodman's aesthetic theory on one side and critiques of modern architecture articulated by figures like Peter Blake Charles Jencks and Robert Venturi Denise Scott Brown on the other Grounded in Goodman's aesthetic theory the book explores his conceptual

framework within the context of modern architecture At the heart of the investigation lies Goodman s concept of exemplification While his notion of denotation pertains to representational elements often ornaments in architecture exemplification accentuates specific formal properties at the expense of others including color spatial orientation transparency seriality and the like Supplemented by findings from phenomenology the book traces these effects in buildings notably those by Ludwig Mies van der Rohe Walter Gropius Le Corbusier and Frank Lloyd Wright all key figures in the critiques of modern architecture Employing Goodman s framework the book aims to address accusations of emptiness and alienation directed at modern architecture in the postwar era It illustrates that modern architecture symbolizes aesthetically in a fundamentally different way than architecture from earlier periods This book will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

Critique of Architecture Douglas Spencer,2021-01-18 Critique of Architecture offers a renewed and radical theorization of the relations between capital and architecture It explicates the theoretical gymnastics through which architecture legitimates its services to neoliberalism examines the discipline s production of platforms for happily compliant consumers and challenges its entrepreneurial self image Critique of Architecture also addresses the discourse of autonomy questioning its capacity to engage effectively with the terms and conditions of capitalism today analyses the post political turns of contemporary architecture theory and reckons with the legacies and limitations of critical theory

Entering Architectural Practice James Tait,2020-11-30 Featuring exclusive interviews with the internationally renowned architects Kengo Kuma Alberto Campo Baeza pela Videcnik OFIS Fernanda Canales Jonathan Sergison Sergison Bates and Jane Hall Assemble Entering Architectural Practice is a practical and honest guide for architecture students entering the world of architectural practice There is often a disconnection between what you are taught in architecture school and the actual practice of architecture in the workplace As both a practising architect and architecture school tutor the author has first hand experience of this disconnection and so helps students bridge this divide between academia and practice Focused on providing industry insight dispelling myths and above all providing a combination of reality and hope to students of architecture entering the workplace the book is beautifully and richly illustrated providing a compelling visual story alongside the invaluable information it imparts Serious but enjoyable thoroughly researched but highly approachable this book is simply essential reading for every individual about to embark on a career in practice

All-Inclusive Engagement in Architecture Farhana Ferdous,Bryan Bell,2020-12-22 Should all inclusive engagement be the major task of architecture All Inclusive Engagement in Architecture Towards the Future of Social Change presents the case that the answer is yes Through original contributions and case studies this volume shows that socially engaged architecture is both a theoretical construct and a professional practice navigating the global politics of poverty charity health technology neoliberal urbanism and the discipline s exclusionary basis The scholarly ideas and design projects of 58 thought leaders demonstrate the architect s role as a revolutionary social agent

Exemplary works are included from the United States Mexico Canada Africa Asia and Europe This book offers a comprehensive overview and in depth analysis of all inclusive engagement in public interest design for instructors students and professionals alike showing how this approach to architecture can bring forth a radical reformation of the profession and its relationship to society

Le Corbusier, History and Tradition Armando Rabaça, 2017-05-01 The view of modernism as representing an epistemological break between technology and history and tradition has long been challenged Le Corbusier's work has proved to be an inexhaustible reference point in this debate This is due on the one hand to the legacy of nineteenth century historicism and on the other to his creative process of creation through destruction which as John Summerson has noted is comparable to the processes of avant garde poets and painters The contributions to this book explore particular episodes which bring to light both the operative role of the past in the creation of a new abstract synthesis and Le Corbusier's modernist historical consciousness They illustrate how the past participated in the modernist creative process of abstract art from the 1920s machine aesthetics to the late infatuation with myth They also shed light on the extent to which the operative quality of the history was framed by a comprehensive historical vision that took the form of metanarrative which neither the analytical studies on his architecture nor the synthetic approaches to his philosophical thinking should dismiss

Circular Architecture Francesca Zanotto, 2022-02-28 Circular economy opens a new domain for architectural design where architecture is focused on its production and disposal cycles and the process is intended as the final outcome of the project The circular paradigm is the product of the political discourse and critical attitude which are globally questioning the use of natural resources and the origins of goods As a model of production and consumption aiming to recover the retained value in waste and optimize resource utilization the circular framework is one of the most radical thinking patterns of contemporary age developing specific cultural and social attitudes

How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science *Urban Labyrinths* Pablo Meninato, Gregory Marinic, 2024-03-29

Urban Labyrinths Informal Settlements Architecture and Social Change in Latin America examines intervention initiatives in informal settlements in Latin American cities as social spatial architectural and cultural processes From the mid 20th century to the present Latin America and other regions in the Global South have experienced a remarkable demographic trend with millions of people moving from rural areas to cities in search of work healthcare and education Without other options these migrants have created self built settlements mostly located on the periphery of large metropolitan areas While the initial reaction of governments was to eliminate these communities since the 1990s several Latin American cities began to advance new urban intervention approaches for improving quality of life This book examines informal settlement interventions in five Latin American cities Rio de Janeiro Medell n S o Paulo Buenos Aires and Tijuana It explores the Favela Bairro Program in Rio de Janeiro during the 1990s which sought to improve living conditions and infrastructure in favelas It investigates projects propelled by Social Urbanism in Medell n at the beginning of the 2000s aimed at revitalizing marginalized areas by creating a public transportation network constructing civic buildings and creating public spaces Furthermore the book examines the long term initiatives led by SEHAB in S o Paulo which simultaneously addresses favela upgrading works water pollution remediation strategies and environmental stewardship It discusses current intervention initiatives being developed in informal settlements in Buenos Aires and Tijuana exploring the urban design strategies that address complex challenges faced by these communities Taken together the Latin American architects planners landscape architects researchers and stakeholders involved in these projects confirm that urbanism architecture and landscape design can produce positive urban and social transformations for the most underprivileged This book will be of interest to students researchers and professionals in planning urbanism architecture urban design landscape architecture urban geography public policy as well as other spatial design disciplines Philosophy and the City Keith Jacobs, Jeff Malpas, 2019-03-15

Philosophy has its origins in the city and in the context of our own highly urbanised modes of living the relationship between philosophy and the city is more

important than ever The city is the place in which most humans now play out their lives and the place that determines much of the cultural social economic and political life of the contemporary world Towards a Philosophy of the City explores a wide range of approaches and perspectives in a way that is true to the city's complex and dynamic character The volume begins with a comprehensive introduction that identifies the key themes and then moves through four parts examining the concept of the city itself its varying histories and experiences the character of the landscapes that belong to the city and finally the impact of new technologies for the future of city spaces Each section takes up aspects of the thinking of the city as it develops in relation to particular problems contexts and sometimes as exemplified in particular cities This volume provides an invaluable resource for students and scholars in Philosophy Geography Sociology and Urban Studies Sustainability, Green IT and Education Strategies in the Twenty-first Century Tomayess Issa, Pedro Isaias, Theodora Issa, 2017-07-26 This work presents and discusses the latest approaches and strategies for implementing Sustainability and Green IT into higher education and business environments Following the global financial crisis in 2007-2008 businesses began to struggle coping with the increased IT/IS cost and their environmental footprint As a consequence action by universities to incorporate sustainability and Green IT as parts of their teaching and learning materials acknowledging their importance for global and local businesses is being increasingly implemented The book addresses the cooperation and coordination between academics and practitioners needed in order to achieve the changes required to obtain sustainability Intended for researchers lecturers and post graduate students as well as professionals in the Information Society and ICT and education sectors and policy makers

Politics of Recuperation Francisco Martinez, 2020-06-29 Through a range of ethnographic case studies focusing on the Portuguese recovery after the economic crisis this book begins a conversation about the experience of recuperation and repair Located in the cracks and gaps between the state and society recuperation appears as a social and infrastructural answer linked to reciprocity critical urbanity generational interweaving alternate ordering and reconnection of different bodies and histories With chapters looking at public art in Lisbon and recuperative modes of action this collection takes a thorough look at a society in crisis and shows how the people of the community create micro politics of resistance Ultimately Politics of Recuperation reflects on the meaning of personal and collective resilience in Europe today as well as on the limits and interstices of contemporary politics

How is Architecture Political? Joseph Bedford, 2024-03-07 Chantal Mouffe has transformed the contemporary understanding of politics through her re-reading of political theory inspired by anti-foundationalist philosophy based on Saussure's linguistics Freud's psychoanalysis and Derrida's deconstruction Her writings have challenged the centrist post-political ideology of the 1990s and presciently diagnosed the emergence of right-wing populism seen today with Trump and Brexit For Mouffe such populism is the result of the failed centrist conception of politics reduced to technical management She has called for a return to politics on the view that social antagonisms cannot be reconciled but must be channeled into an agonistic form of institutionally stabilized struggle This book brings Chantal

Mouffe's agonistic model of politics into direct dialogue with architecture and inquiries into the role that architecture plays constructing the political order of society either by concealing or revealing its antagonisms and ideological conflicts In doing so it asks in what ways architecture operates politically whether institutionally in terms of its spaces and its part in forming cities or as an aesthetic object with mediatic agency Through this detailed exchange between Mouffe and four of the world's leading architectural thinkers Reinhold Martin Ines Weizman Pier Vittorio Aureli and Sarah Whiting a debate unfolds within the book that tests the implications of Mouffe's agonistic model of politics for architectural practice today Through this Bedford explores how architectural history architectural drawing the making of spectacular monuments the design and policies behind housing and the making of public and private space all potentially contribute to the formulation of the channeling of social conflict into an agonistic form

Retreat Ethel Baraona Pohl, Marina Otero Verzier, Malkit Shoshan, 2020-07-31 Retreat is a lexicon or inventory of language to describe the action of withdrawal from civic life By creating a spatial approach to the language of escape the publication attempts to widen the definitions of familiar terms such as safety surveillance and self reliance The lexicon draws attention to current global events such as the thread of epidemic disease climate catastrophe the militarization of public space and the impact of mass surveillance on daily life specifically the emotional and social impact of the presence of unknown and potentially life threatening elements The editorial approach for the lexicon is to investigate the notion and practices of retreat its strategies and imaginaries through others words as they inform contemporary spatial paradigms A wide variety of source types from blogs to Wikipedia to academic texts and media photographs films books objects and forms of literary genres are mobilized to create a portrait of retreat that describes not only militarized zones but dreams and anxieties of individuals across the globe helping us better understand how humans might negotiate civil and human rights and freedoms within civic society at large

The Architecture of Phantasmagoria Libero Andreotti, Nadir Lahiji, 2016-11-10 In a time of mass mediated modernity the city becomes almost by definition a constitutively mediated city Today more than ever before the omnipresence of media in every sphere of culture is creating a new urban ontology saturating fracturing and exacerbating the manifold experience of city life The authors describe this condition as one of hyper mediation a qualitatively new phase in the city's historical evolution The concept of phantasmagoria has pride of place in their study using it as an all embracing explanatory framework they explore its meanings as a critical category to understand the culture and the architecture of the contemporary city Andreotti and Lahiji argue that any account of architecture that does not include understanding the role and function of media and its impact on the city in the present tele technological capitalist society is fundamentally flawed and incomplete Their approach moves from Walter Benjamin through the concepts of phantasmagoria and of media as theorized also by Theodor Adorno Siegfried Kracauer and a new generation of contemporary critics towards a new socio critical and aesthetic analysis of the mediated space of the contemporary city

Lo neutro. Arquitectura por defecto Silvia Colmenares Vilata, 2024-12-02 Este texto pretende

comprobar la viabilidad de lo neutro como posible instrumento para nombrar algunas operaciones en arquitectura Frente al sistema de dualidades con el que enunciamos lo real lo neutro se sitúa no tanto en el punto medio como en el punto opuesto a ambos términos No es la conjunción de contrarios sino aquello que desvía la propia pregunta que obliga a elegir Primero a los conceptos de indefinición e indiferencia e inacción lo neutro se revela como un mecanismo fundamental de disolución para la arquitectura Tras un análisis del contexto teórico sobre el que se asienta la dialéctica bidireccional forma función su consolidación en los primeros años del siglo XX y también su entrada en crisis mediante la introducción de nociones multirrelacionales como entorno y sistema se proponen tres modelos de estudio la planta tipo la planta nica y la planta de equivalencias En cada uno de ellos se reconoce la presencia de los mecanismos geométricos y operaciones conceptuales que lo neutro utiliza para generar respectivamente condiciones de soporte de marco o de campo Todos ellos apuntan a un entendimiento de lo neutro que asocia su fórmula de doble negación ni lo uno ni lo otro con el estado más incipiente de la materia aquel en el que todavía no es pero que ya contiene todos los elementos de posibilidad de ser lo neutro como potencia Por ello se desarrollan también algunas estrategias basadas en la renuncia al abordar la cuestión de la potencialidad desde la negación Partiendo de dos condiciones superficiales básicas la del muro vertical y la del suelo horizontal se analizan algunos discursos basados en una restricción radical a estos dos elementos Por último la posibilidad de toda potencia de no actualizarse lleva a explorar el no hacer como renuncia voluntaria y su capacidad de transformarse en acto de resistencia
