INTRODUCTION	<p><b>Local maps and street maps</b>  <b>Find home, school and places of interest on a map of the local area.</b>          People use maps to find their way around and to find interesting places. Most cities in South Africa have street maps. These maps are usually prepared as a book because showing a city on one sheet of paper would be too big to use.</p> <p><b>Using a street map to find places and describe a route</b>          Street maps help you to find places and to describe the <b>route</b> from one place to another. Each street has a name to help you explain which route to take. The point where the streets cross each other is called an <b>intersection</b>.          A street map has two features to help you find things:          ~ <b>grid lines</b> drawn on the maps to form <b>grid squares</b>          ~ an <b>index</b> at the back.</p> <p><b>Vocabulary</b>  <b>Grid lines:</b> vertical and horizontal lines drawn on a map in a grid shape.  <b>Grid squares:</b> the squares (sometimes rectangles) on a map formed by grid lines  <b>Grid reference:</b> using numbers and letters on the grid lines to refer to a specific place on a map.</p> <p><b>Using an index to find places Vocabulary</b></p>
