Aim: (Takes the form of a "How" or "Why" question that is small enough to tackle in a class period, but this promotes student thinking. The "Aim" should appear visible to students at the front of the room for the entire period. This question is often the "Exit" assessment. It takes the class period to answer and should be displayed in front of the room for the entire period.)

How can you add rational numbers?

Answer: *If the two numbers have the same sign you can add them together and give the sum the same sign as the two numbers. If the sum of two numbers have different signs, find the difference of their absolute values and use the sign of the number with the greater absolute value.*
