Lessons For Extending Place Value Grade 3 Teaching Arithmetic:

Lessons for Extending Place Value Maryann Wickett, Marilyn Burns, 2005 Through games investigations and children's literature students explore the base ten system through the ten thousands moving from using concrete manipulatives to more abstract reasoning Using addition subtraction multiplication and division students apply their knowledge of place value to solve a variety of problems pub desc *Number Talks* Sherry Parrish, 2010 A multimedia professional learning resource Cover *Lessons for Introducing Fractions* Marilyn Burns, 2001 The Marilyn Burns Fraction Kit Grades 4-6 is recommended to help implement the lessons in this book pub desc *Lessons for First Grade* Stephanie Sheffield, 2001 Through manipulative materials and real world problems children learn to estimate understand numerical relationships develop number sense compute mentally and with paper and pencil and use arithmetic as a tool to solve problems pub desc

Lessons for Introducing Division Maryann Wickett, Susan Ohanian, Marilyn Burns, 2002 Through a variety of activities students gain insight into the relationship between division and multiplication and begin to see how division relates to multiple groups of equal size Students also learn how to recognize the two types of division problems think about remainders in different ways and use division to solve real world problems pub desc Math Exchanges Kassia Omohundro Wedekind, 2011 Traditionally small group math instruction has been used as a format for reaching children who struggle to understand Math coach Kassia Omohundro Wedekind uses small group instruction as the centerpiece of her math workshop approach engaging all students in rigorous math exchanges The key characteristics of these mathematical conversations are that they are 1 short focused sessions that bring all mathematical minds together 2 responsive to the needs of the specific group of mathematicians and 3 designed for meaningful guided reflection As in reading and writing workshop students in math workshop become self directed and independent while participating in a classroom community of learners Through the math exchanges students focus on number sense and the big ideas of mathematics Teachers guide the conversations with small groups of students mediating talk and thinking as students share problem solving strategies discuss how math works and move toward more effective and efficient approaches and greater mathematical understanding Although grounded in theory and research Math Exchanges Guiding Young Mathematicians in Small Group Meetings is written for practicing teachers and answers such questions as the following How can I use a math workshop approach and follow a certain textbook or set of standards How should I form small groups How often should I meet with small groups What should I focus on in small groups How can I tell if my groups are making progress What do small group math exchanges look like sound like and feel like Beyond the Bubble Maryann Wickett, Eunice Hendrix-Martin, 2011 Multiple choice testing is an educational reality Rather than complain about the negative impact these tests may have on teaching and learning why not use them to better understand your students true mathematical knowledge and comprehension Maryann Wickett and Eunice Hendrix Martin show teachers how to move beyond the student's answer right or wrong to uncover understanding and or

misconceptions By asking a few simple follow up questions teachers can learn a great deal about student understanding and make better more informed instructional decisions The Beyond the Bubble books grades 2 3 and grades 4 5 are each divided into five strands number measurement algebra geometry and probability with six problems per strand Each problem includes an overview of the objective of the test question a sample question typical of those found on standardized tests strategies students employ to solve the problem conversation starters student work student teacher conversations and instructional strategies to advance student learning Teachers will also find suggestions for differentiation reproducible of sample questions and a comprehensive list of additional resources With dozens of sample test questions and numerous student samples Beyond the Bubble shows educators how to use multiple choice tests to provide more purposeful focused mathematics instruction for all of their students
