

The background of the book cover is a vibrant landscape photograph. In the foreground, there's a field of low-lying plants with patches of red, orange, and green. A calm lake in the middle ground reflects the surrounding scenery. The background features a range of mountains, with the highest peaks covered in snow and partially shrouded in white clouds. The sky is a mix of blue and white. The title 'Physical Geography' is printed in a large, dark serif font, and 'Laboratory Manual' is in a smaller, similar font below it.

Agich,1993 The realities and misconceptions of long term care and the challenges it presents for the ethics of autonomy are analyzed in this perceptive work While defending the concept of autonomy the author argues that the standard view of autonomy as non interference and independence has only a limited applicability for long term care He explains that autonomy should be understood as a comprehensiveness that defines the overall course of a person s life rather than as a way of responding to an isolated situation Agich distinguishes actual and ideal autonomy and argues that actual autonomy is better revealed in the everyday experiences of long term care than in dramatic conflict ridden paradigm situations such as decisions to institutionalize to initiate aggressive treatments or to withhold or to withdraw life sustaining treatments Through a phenomenological analysis of long term care he develops an ethical framework for it by showing how autonomy is actually manifest in certain structural features of the social world of long term care Throughout this timely work the rich sociological and anthropological literature on aging and long term care is referenced and the practical ethical questions of promoting and enhancing the exercise of autonomy are addressed
