Lectures on Electrochemical Corrosion Marcel Pourbaix,2012-12-06 Workers in the field of corrosion and their students are most fortunate that a happy set of circumstances brought Dr Marcel Pourbaix into their field in 1949 First he was invited while in the USA to demonstrate at a two week visit to the National Bureau of Standards the usefulness of his electro chemical concepts to the study of corrosion Secondly also around the same time Prof H H Uhlig made a speech before the United Nations which pointed out the tremendous economic consequences of corrosion Because of these circumstances Dr Pourbaix has reminisced he chose to devote most of his efforts to corrosion rather than to electrolysis batteries geology or any of the other fields where one might add they were equally valuable This decision resulted in his establishing CEBELCOR Centre Belge d Etude de la Corrosion and in his development of a course at the Free University of Brussels entitled Lectures on Electrochemical Corrosion This book is the collection of these lectures translated into English
