Key:

**SEP** - Science and Engineering Practice

**CCC** - Crosscutting Concept

**DCI** - Disciplinary Core Idea

**DPA** - Decision Point Assessment

**ESRs** - Expected Student Responses

<b>Lesson Topic/Concept:</b>	Balloon Rockets/ The relationship between compressed air and useable pressure to propel a balloon. (air moves things, air takes up space, air can inflate or make things bigger, air can be squeezed, air is invisible, air is a gas.)
<b>NGSS PE(s):</b>	2PS1-4 Construct an argument from evidence based on the observable properties of air. 3PS2-2 Make observations and/or measurements of an object's motion to provide evidence that a pattern can be used to predict future motion.
<b>NGSS 3 Dimensions</b>	SEP: Engaging in argument from evidence; Analyzing and interpreting data CCC: Cause and Effect DCI: PS1A : Matter can be described and classified based on observable properties.
<b>Essential Question:</b>	How does the amount of compressed air affect the distance of the balloon rocket?
<b>Lesson Content &amp; Language Objective:</b>	Academic Discussion based on evidence Vocabulary: pressure, compressed, propel, distance If we _____, then _____ (cause) (effect)

# Lesson Plans For Ngss

**Jim Concannon, Patrick Brown**

## **Lesson Plans For Ngss:**

**Inquiry-Based Science Activities in Grades 6-12** Patrick Brown,James Concannon,2018-03-19 This new book shows middle and high school science teachers how to use evidence based inquiry to help students achieve deeper conceptual understanding Drawing on a wealth of research authors Pat Brown and Jim Concannon demonstrate how direct hands on experience in the science classroom can enable your students to become more self reliant learners They also provide a plethora of model lessons aligned with the Next Generation Science Standards NGSS and offer advice on how to create your own lesson plans and activities to satisfy the demands of your curriculum With the resources in this book you and your students will be able to ditch the textbook and embark upon an exciting and rewarding journey to scientific discovery

**Evidence-Based Science Activities in Grades 3-5** Patrick Brown,James Concannon,2019-01-10 This new book shows elementary teachers how evidence based science activities help students achieve deeper conceptual understanding Drawing on a wealth of research authors Patrick Brown and James Concannon demonstrate how direct hands on experience in the science classroom can enable your students to become more self reliant learners They also provide a plethora of model lessons aligned with the Next Generation Science Standards NGSS and offer advice on how to create your lesson plans and activities to satisfy the demands of your curriculum With the resources in this book you and your students will be able to ditch the textbook and embark upon an exciting and rewarding journey to scientific discovery

**Inquiry-Based Science Activities in Grades K-5** Jim Concannon,Patrick Brown,2018-09 This new book shows elementary teachers how evidence based science activities help students achieve deeper conceptual understanding Drawing on a wealth of research authors Pat Brown and Jim Concannon demonstrate how direct hands on experience in the science classroom can enable your students to become more self reliant learners They also provide a plethora of model lessons aligned with the Next Generation Science Standards NGSS and offer advice on how to create your lesson plans and activities to satisfy the demands of your curriculum With the resources in this book you and your students will be able to ditch the textbook and embark upon an exciting and rewarding journey to scientific discovery

**Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners** Cheryl M. Adams,Alicia Cotabish,Debbie Dailey,2021-09-23 A Teacher s Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners provides teachers and administrators with practical examples of ways to build comprehensive coherent and rigorous science learning experiences for gifted and advanced students from kindergarten to high school It provides an array of examples across the four domains of science physical sciences Earth and space sciences life sciences and engineering technology and applications of science Each learning experience indicates the performance expectation addressed and includes a sequence of activities implementation examples connections to the CCSS Math and CCSS ELA and formative assessments Chapters on specific instructional and management strategies assessment and professional development suggestions for implementing the standards within the classroom will be

helpful for both teachers and administrators      Using STEM-Focused Teacher Preparation Programs to Reimagine Elementary Education Cayton, Emily, Sanders, Miriam, Williams, John A., 2024-02-07 There has been an increasing issue in STEM education as many students lack interest and knowledge in STEM disciplines and fields Given the high demand for STEM workers and the projected growth of STEM fields it is important to expose students to STEM education beginning as early as elementary school Some K 6 programs are not preparing teacher candidates adequately for STEM content or skills especially in engineering Integrating these disciplines and practices throughout elementary education programs could result in more exposure for K 6 students Using STEM Focused Teacher Preparation Programs to Reimagine Elementary Education presents anecdotal stories of how elementary education programs have altered their content offerings field experiences and curricula to expand their teacher candidates knowledge and exposure to STEM disciplines and fields Covering key topics such as diversity teacher education and technology integration this premier reference source is ideal for industry professionals policymakers administrators of K 12 education pre service teachers teacher educators researchers scholars academicians practitioners instructors and students      **The Science Teacher's Toolbox** Tara C. Dale, Mandi S. White, 2020-04-09 A winning educational formula of engaging lessons and powerful strategies for science teachers in numerous classroom settings The Teacher s Toolbox series is an innovative research based resource providing teachers with instructional strategies for students of all levels and abilities Each book in the collection focuses on a specific content area Clear concise guidance enables teachers to quickly integrate low prep high value lessons and strategies in their middle school and high school classrooms Every strategy follows a practical how to format established by the series editors The Science Teacher s Toolbox is a classroom tested resource offering hundreds of accessible student friendly lessons and strategies that can be implemented in a variety of educational settings Concise chapters fully explain the research basis necessary technology Next Generation Science Standards correlation and implementation of each lesson and strategy Favoring a hands on approach this book provides step by step instructions that help teachers to apply their new skills and knowledge in their classrooms immediately Lessons cover topics such as setting up labs conducting experiments using graphs analyzing data writing lab reports incorporating technology assessing student learning teaching all ability students and much more This book enables science teachers to Understand how each strategy works in the classroom and avoid common mistakes Promote culturally responsive classrooms Activate and enhance prior knowledge Bring fresh and engaging activities into the classroom and the science lab Written by respected authors and educators The Science Teacher s Toolbox Hundreds of Practical Ideas to Support Your Students is an invaluable aid for upper elementary middle school and high school science educators as well those in teacher education programs and staff development professionals      **The Go-To Guide for Engineering Curricula, Grades 9-12** Cary I. Sneider, 2014-12-05 How to engineer change in your high school science classroom With the Next Generation Science Standards your students won t just be scientists they ll be engineers But

you don't need to reinvent the wheel Seamlessly weave engineering and technology concepts into your high school math and science lessons with this collection of time tested engineering curricula for science classrooms Features include A handy table that leads you straight to the chapters you need In depth commentaries and illustrative examples A vivid picture of each curriculum its learning goals and how it addresses the NGSS More information on the integration of engineering and technology into high school science education      **Teaching and Learning Online** Franklin S. Allaire, Jennifer E.

Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on However the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning Killham et al 2014 Wong et al 2018 PreK 12 teachers consistently report feeling underprepared or overwhelmed by online learning environments Molnar et al 2021 Seaman et al 2018 This is coupled with persistent challenges related to elementary teachers lack of confidence and low science teaching self efficacy Brigid Borrachero Bermejo Gunning Duran Duran 2004 Ideal for undergraduate teacher candidates graduate students teacher educators classroom teachers parents and administrators this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research based foundation      **Next Generation**

**Science Standards** NGSS Lead States, 2013-08-15 Next Generation Science Standards identifies the science all K 12 students should know These new standards are based on the National Research Council's A Framework for K 12 Science Education The National Research Council the National Science Teachers Association the American Association for the Advancement of Science and Achieve have partnered to create standards through a collaborative state led process The standards are rich in content and practice and arranged in a coherent manner across disciplines and grades to provide all students an internationally benchmarked science education The print version of Next Generation Science Standards complements the nextgenscience.org website and Provides an authoritative offline reference to the standards when creating lesson plans Arranged by grade level and by core discipline making information quick and easy to find Printed in full color with a lay flat spiral binding Allows for bookmarking highlighting and annotating      Teaching Climate Change for Grades 6-12 Kelley T. Lê, 2024-11-18 Looking to tackle climate change and climate science in your classroom This timely and insightful book supports secondary science teachers in developing effective curricula around the Next Generation Science Standards NGSS by grounding their instruction on the climate crisis This new edition focuses on meeting teachers where they are in their teaching and learning while tending to various contexts communities and cultures to activate educators in

understanding and responding to the climate crisis in this moment Chapters offer design and implementation support for 21st century learning experiences centered around the climate emergency for meaningful engagement Dr L provides an overview of the teaching shifts needed for the NGSS using climate change as the vehicle of instruction She also supports climate literacy for students and teachers via urgent topics in climate science and environmental justice Teachers will also learn how to engage with the complexities of climate change by exploring social racial and environmental injustices stemming from the climate crisis that directly impact their students Examples of successful applications of these learning experiences are new to the second edition as well as added activities and overall updates to research and data By anchoring instruction on the climate emergency through an intersectional lens starting with teachers core beliefs and values Dr L offers guidance on how educators can activate students as agents of change for their own communities *International Science and Technology Education* Ortwin Renn,Nicole Karafyllis,Andreas Hohlt,Dorothea Taube,2015-06-24 Education in science technology engineering and mathematics STEM is crucial for taking advantage of the prospects of new scientific discoveries initiating or promoting technological changes and managing opportunities and risks associated with innovations This book explores the emerging perspectives and methodologies of STEM education and its relationship to the cultural understanding of science and technology in an international context The authors provide a unique perspective on the subject presenting materials and experiences from non European industrialized as well as industrializing countries including China Japan South Korea India Egypt Brazil and the USA The chapters offer a wide scope of interpretations and comparative reviews of STEM education by including narrative elements about cultural developments considering the influence of culture and social perceptions on technological and social change and applying innovative tools of qualitative social research The book represents a comprehensive and multidisciplinary review of the current status and future challenges facing STEM education across the world including issues such as globalization interdependencies of norms and values effects on equity and social justice as well as resilience Overall the volume provides valuable insights for a broad and comprehensive international comparison of STEM philosophies approaches and experiences STEM Education with Robotics Purvee Chauhan,Vikram Kapila,2023-05-11 This book offers a synthesis of research curriculum examples pedagogy models and classroom recommendations for the effective use of robotics in STEM teaching and learning Authors Chauhan and Kapila demonstrate how the use of educational robotics can catalyze and enhance student learning and understanding within the STEM disciplines The book explores the implementation of design based research DBR technological pedagogical and content knowledge TPACK and the 5E instructional model among others Chapters draw on a variety of pedagogical scaffolds to help teachers deploy educational robotics for classroom use including research driven case studies strategies and standards aligned lesson plans from real life settings This book will benefit STEM teachers STEM teacher educators and STEM education researchers Planning Science Instruction for Emergent Bilinguals Edward G. Lyon,Kelly M. Mackura,2023 This

practical resource takes educators through a planning process from selecting standards to designing learning activities that weaves together language literacy and science in ways that are responsive to emergent bilinguals Drawing on extensive and current research the authors show how secondary educators can use students own language and lived experiences coupled with authentic science practices to provide rich and relevant language support Using a science unit as a shared text readers will learn how to gather rich knowledge about emergent bilinguals unpack the ideas and language demands of Next Generation Science Standards strategically embed language and literacy standards in the curriculum and sequence learning activities around an anchoring phenomenon a text and an assessment In the process readers will come away with a repertoire of planning tools and examples of how to support emergent bilinguals in using language to collaborate with others and to interpret and produce texts that are central to learning and doing science Planning Science Instruction for Emergent Bilinguals blends theory and practice so readers understand both how and why this planning process can be used to disrupt social inequity for emergent bilinguals Book Features Describes intentional decisions that educators can make when planning a science unit or learning experience Shows how to weave together Next Generation Science Standards Common Core English Language Arts Standards and language development Provides a model unit about kelp forest ecosystems to illustrate how theory is translated into practice Demonstrates how to use emergent bilinguals assets linguistic skills family experiences personal interests to create engaging science instruction Provides a set of planning tools including both blank templates and completed examples to guide educators through the planning process

*Moving INTO the Classroom* Stacia C Miller, Suzanne F Lindt, 2017-09-06 This textbook focuses on research in movement integration and the benefits of physical activity to the child s physical cognitive emotional and social development It includes research on and suggestions for integrating movement into English language arts mathematics science and social studies for lower and upper elementary students Though the textbook is specifically aimed at elementary level teachers secondary teachers and pre service teachers can modify the activities to fit their lessons as well

*Guide to Implementing the Next Generation Science Standards* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Guidance on Implementing the Next Generation Science Standards, 2015-03-27 A Framework for K 12 Science Education and Next Generation Science Standards NGSS describe a new vision for science learning and teaching that is catalyzing improvements in science classrooms across the United States Achieving this new vision will require time resources and ongoing commitment from state district and school leaders as well as classroom teachers Successful implementation of the NGSS will ensure that all K 12 students have high quality opportunities to learn science Guide to Implementing the Next Generation Science Standards provides guidance to district and school leaders and teachers charged with developing a plan and implementing the NGSS as they change their curriculum instruction professional learning policies and assessment to align with the new standards For each of these elements this report lays out recommendations for action around key issues

and cautions about potential pitfalls Coordinating changes in these aspects of the education system is challenging As a foundation for that process Guide to Implementing the Next Generation Science Standards identifies some overarching principles that should guide the planning and implementation process The new standards present a vision of science and engineering learning designed to bring these subjects alive for all students emphasizing the satisfaction of pursuing compelling questions and the joy of discovery and invention Achieving this vision in all science classrooms will be a major undertaking and will require changes to many aspects of science education Guide to Implementing the Next Generation Science Standards will be a valuable resource for states districts and schools charged with planning and implementing changes to help them achieve the goal of teaching science for the 21st century **Moving From Spoken to Written**

**Language With ELLs** Ivannia Soto, 2014-06-20 Mastering spoken language is the key to writing success for English language learners English language learners struggle to meet the increased classroom writing demands of the Common Core State Standards and many schools seem at a loss for solutions In these pages ELL expert Ivannia Soto builds on the groundbreaking research she presented in her previous book ELL Shadowing as a Catalyst for Change to show how oral language development scaffolds writing skills To implement this knowledge Soto offers educators a powerful set of tools Exciting spoken techniques such as Socratic Seminar Frayer model and Think Pair Share that build vocabulary and extend into academic writing Approaches to teaching three essential styles of writing argumentative procedural and narrative Sample lesson plans and graphic organizer templates ELLs must develop oral language skills before meeting the Common Core s writing requirements This book provides the tools to make this happen This timely book collects oral language strategies designed to scaffold academic writing for English language learners at intermediate and advanced levels of English proficiency Concrete examples support the goal of teaching college and career ready standards across content areas Charlene Rivera Research Professor The George Washington University Center for Equity and Excellence in Education

*The Culturally Competent Educator* Almitra L. Berry, 2025-03-06 Actionable strategies to support the strengths of every learner In *The Culturally Competent Educator* Dr Almitra L Berry draws on more than three decades of experience to offer educators a roadmap to implementing equitable practices and policies Rooted in research and practical advice this book helps educators foster an environment where every student feels valued and respected By exploring culturally and linguistically affirming approaches to instruction assessment and grading readers will be empowered to break down barriers to student learning and achievement Key features include Clear explanations of key equity indicators and concepts Practical examples and classroom lesson plans Strategies for improving instructional materials and developing media literacy Tools for self assessment and reflection Dr Berry s guide emphasizes the importance of engaging in professional learning communities for deeper understanding and support By working through this book educators can become equity warriors transforming their classrooms into places where all students can thrive socially behaviorally and academically This is a must read for

educators administrators and anyone committed to creating a more just and inclusive educational environment *The Art and Science of Lesson Design* John R. Walkup,2020-01-11 The Cognitive Rigor Matrix superposes two of the most common tools used in K 12 education Bloom s Revised Taxonomy and Depth of Knowledge This matrix has been adopted by numerous state departments of education and national organizations to evaluate the rigor of educational materials The matrix also offers a powerful ability to help teachers plan and carry out standards based lessons that best support student learning This book aimed at secondary school teachers of all subjects provides a systematic means of leveraging the Rigor Cube to develop rigorous standards based lesson plans The approach employed in this book includes the development of culminating activities for students to demonstrate their learning identification of standards based lesson content selection of potentially effective instructional methods and student questioning strategies Special methods for supporting students who are deficient in their background knowledge without undermining the rigor of lessons are also included Sample lessons are included that illustrate every step of the lesson planning process from start to finish These sample lesson plans address state content standards related to the Common Core State Standards both math and English language arts Next Generation Science Standards career technical education standards and art *Teaching K-12 Science and Engineering During a Crisis* National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Science Education,Jennifer Self,2021-01-29 The COVID 19 pandemic is resulting in widespread and ongoing changes to how the K 12 education system functions including disruptions to science teaching and learning environments Students and teachers are all figuring out how to do schooling differently and districts and states are working overtime to reimagine systems and processes This is difficult and stressful work in the middle of the already stressful and sometimes traumatic backdrop of the global pandemic In addition students with disabilities students of color immigrants English learners and students from under resourced communities have been disproportionately affected both by the pandemic itself and by the resulting instructional shifts *Teaching K 12 Science and Engineering During a Crisis* aims to describe what high quality science and engineering education can look like in a time of great uncertainty and to support practitioners as they work toward their goals This book includes guidance for science and engineering practitioners with an emphasis on the needs of district science supervisors curriculum leads and instructional coaches *Teaching K 12 Science and Engineering During a Crisis* will help K 12 science and engineering teachers adapt learning experiences as needed to support students and their families dealing with ongoing changes to instructional and home environments and at the same time provide high quality in those experiences

Developing Assessments for the Next Generation Science Standards National Research Council,Division of Behavioral and Social Sciences and Education,Board on Science Education,Board on Testing and Assessment,Committee on Developing Assessments of Science Proficiency in K-12,2014-05-29 Assessments understood as tools for tracking what and how well students have learned play a critical role in the classroom *Developing Assessments for the Next Generation Science*

Standards develops an approach to science assessment to meet the vision of science education for the future as it has been elaborated in A Framework for K 12 Science Education Framework and Next Generation Science Standards NGSS These documents are brand new and the changes they call for are barely under way but the new assessments will be needed as soon as states and districts begin the process of implementing the NGSS and changing their approach to science education The new Framework and the NGSS are designed to guide educators in significantly altering the way K 12 science is taught The Framework is aimed at making science education more closely resemble the way scientists actually work and think and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time It structures science education around three dimensions the practices through which scientists and engineers do their work the key crosscutting concepts that cut across disciplines and the core ideas of the disciplines and argues that they should be interwoven in every aspect of science education building in sophistication as students progress through grades K 12 Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework This report reviews recent and current work in science assessment to determine which aspects of the Framework s vision can be assessed with available techniques and what additional research and development will be needed to support an assessment system that fully meets that vision The report offers a systems approach to science assessment in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another Developing Assessments for the Next Generation Science Standards makes the case that a science assessment system that meets the Framework s vision should consist of assessments designed to support classroom instruction assessments designed to monitor science learning on a broader scale and indicators designed to track opportunity to learn New standards for science education make clear that new modes of assessment designed to measure the integrated learning they promote are essential The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students
