

Mathematics Lesson Plan for 3rd, 4th, and 5th grade

For the lessons on March 3, 4, 5, and 6 - 2009
At the Mills College Children's School, Oakland, CA
Instructor: Akihiko Takahashi

a. Title of the Lesson: Fractions

b. Goals of the Unit:

Students will understand the meaning and the representations of fractions in simple cases and appropriately use them.

- To understand that fractions are used to express an amount obtained as a result of equal partitioning and are used to express quantities less than 1
- To understand that a fraction can be considered as a collection of unit fractions
- To understand fraction notation
- To become aware that a fraction can also be put on a number line like whole numbers
- To become aware that addition and subtraction can also be applied to fractions

c. Relationship of the Lesson to the Standards

Prior to this unit:

- Students understand the concepts of whole numbers that includes how to represent them and how to put them on a number line, and developed the ability to use numbers.
- Students become aware that fractions represent one portion of an equally divided object or a fractional part of some quantity from their everyday life.
- Students understand the concepts of length and capacity, and to measure them in simple cases.
 - Students know about the units to be used in measuring length (millimeter (*mm*), centimeter (*cm*), meter (*m*), and customary units such as mile).
 - Students know about the units to be used in measuring capacity (milliliter (*ml*), and liter (*l*).
- To understand the meaning of division and to use it.

This Unit

After this unit

- Students will deepen their understanding of the meaning of fractions and be able to compute fractions in simple cases.

Differentiating Math Instruction William N. Bender,2005-05-18 This exciting and unique book presents practical immediately applicable ideas for differentiating

instruction in maths in the elementary classroom It explains in detail the process of differentiation in maths beginning with lesson planning through implementation of a wide variety of research proven instructional strategies and tactics The Ideas from Teachers feature located in various chapters includes instructional tactics provided by teachers that exemplify the differentiation process Also included are the To Ten Tactics lists which provide simple immediately applicable tactics that can be easily implemented in almost every classroom Approaches to Studying the Enacted Mathematics Curriculum Kathryn Chval, Dan Heck, Iris Weiss, Steven W. Ziebarth, 2012-09-01 Curriculum materials are among the most pervasive and powerful influences on school mathematics In many mathematics classes student assignments the questions the teacher asks the ways students are grouped the forms of assessment and much more originate in curriculum materials At the same time teachers have considerable latitude in how they use their curriculum materials Two classes making use of the same materials may differ markedly in what mathematics content is emphasized and how students are engaged in learning that content This volume considers a variety of research tools for investigating the enactment of mathematics curriculum materials describing the conceptualization development and uses of seven sets of tools Mathematics education researchers curriculum developers teacher educators district supervisors teacher leaders and math coaches will find insights that can improve their work and guidance for selecting adapting and using tools for understanding the complex relationship between curriculum materials and their enactment in classroom instruction Elementary Teachers Guide to Free Curriculum Materials 2005-06 Educators Progress Service, 2005-05 English Language Learners in the Mathematics Classroom Debra Coggins, 2007-02-12 The number of students whose first language is not English is increasing As a result many teachers need new resources to adapt their teaching of mathematics to support the mathematical learning of students with limited English and to include them in rigorous instruction By incorporating multimodal strategies teachers can more confidently teach standards based mathematics that can reach all of their students Through simple straightforward language and examples this resource helps teachers develop specialised understanding and strategy knowledge for supporting a high level of mathematics learning along with language acquisition *Educating for Citizenship in a Canada-China Sister School Reciprocal Learning Partnership* Yishin Khoo, 2022-12-13 This book enriches the discourse around Global Citizenship Education in teacher education through the example of a teacher s experience in a Canada China Sister School reciprocal learning landscape Instead of positioning global citizenship teaching and learning as a set of fixed goals to be attained by teachers alone this book approaches global citizenship teaching and learning as unfinished lifework in progress and as situated curriculum problems to be inquired together by university researchers school teachers and students under the spirit of reciprocity and community This reimagination of narratives theory and action start from collaborative and reciprocal learning partnerships among Chinese and Canadian researchers and teachers in the practicality of re searching and re enacting the purpose and meanings of twenty first century education in a Canada China Sister School setting

Hard-to-Teach Science Concepts Susan Koba, Carol T. Mitchell, 2011 Authors Susan Koba and Carol Mitchell introduce teachers of grades 3-5 to their conceptual framework for successful instruction of hard to teach science concepts. Their methodology comprises four steps: 1. engage students about their preconceptions and address their thinking; 2. target lessons to be learned; 3. determine appropriate strategies; and 4. use Standards-based teaching that builds on student understandings. The authors not only explain how to use their framework but also provide a variety of tools and examples of its application on four hard to teach foundational concepts: the flow of energy and matter in ecosystems; force and motion; matter and its transformation; and Earth's shape. Both preservice and inservice elementary school teachers will find this approach appealing and the authors' engaging writing style and user-friendly tables help educators adapt the method with ease.
