

Lessons Learned

The process of reflecting on an initiative to capture areas for improvement and best practices.

Overview

- An essential element of continuous improvement that is built into a wide range of processes as a wrap-up step.
- Identifying what has worked well as potential best practices.
- Documenting problems that occurred and analyzing the root cause of these problems.
- Identifying areas for improvement.
- Assigning action items for any outstanding steps required to implement improvements.
- Mistakes are openly discussed without assigning blame.

Examples

1. Coding tasks were underestimated resulting in missed deadlines.
2. The design team had not used the product and had not met actual customers.
3. Consensus-based decision making led to an inconsistent set of requirements that were not cohesive nor compatible.
4. As the project was delayed, relationships with vendors turned negative and cooperation broke down.
5. The project was pushed to accept uncontrolled scope change on a "best effort basis." This resulted in a chaotic effort to push through change without updating planning.
