*Magic in Theory* Peter Lamont, Professor Richard Wiseman, 2005-10-28 A useful manual for any magician or curious spectator who wonders why the tricks seem so real this guide examines the psychological aspects of a magician's work Exploring the ways in which human psychology plays into the methods of conjuring rather than focusing on the individual tricks alone this explanation of the general principles of magic includes chapters on the use of misdirection sleight of hand and reconstruction provides a better understanding of this ancient art and offers a section on psychics that warns of their deceptive magic skills *Our Magic* Nevil Maskelyne, David Devant, 1912 **A Cognitive Theory of Magic** Jesper Sørensen, 2007 Magic is a universal phenomenon Everywhere we look people perform ritual actions in which desirable qualities are transferred by means of physical contact and objects or persons are manipulated by things of their likeness In this book Sørensen embraces a cognitive perspective in order to investigate this long established but controversial topic Following a critique of the traditional approaches to magic and basing his claims on classical ethnographic cases the author explains magic's universality by examining a number of recurrent cognitive processes underlying its different manifestations He focuses on how power is infused into the ritual practice how representations of contagion and similarity can be used to connect otherwise distinct objects in order to manipulate one by the other and how the performance of ritual prompts representations of magical actions as effective Bringing these features together the author proposes a cognitive theory of how people can represent magical rituals as purposeful actions and how ritual actions are integrated into more complex representations of events This explanation in turn yields new insights into the constitutive role of magic in the formation of institutionalised religious ritual OUR MAGIC NEVIL. MASKELYNE, 2018 A General Theory of Magic Marcel Mauss, 2005-07-05 Offers a fascinating snapshot of magic throughout various cultures as well as deep sociological and religious insights still very much relevant today **Our Magic: The Art and Theory of Magic**, **Elementary Theory of Numbers** W. **Our Magic** Nevil Maskelyne,2017-07-23 Excerpt from Our Magic The Art in Magic the Theory of Magic the Practice of Magic We do not for a moment suggest that what we have written herein represents the last word to be said concerning magic on the contrary we are well aware that our book is but the commencement of a new departure which We hope may lead to the full elucidation of our subject in every particular The ramifications and extensions of knowledge connected with magic are so vast in their scope that no single treatise can possibly include all that a skilled magician ought to know Consequently we can claim no more than the production of a book which in our opinion serves to indicate rather than to exhaust the manifold topics associated with the art science and practice of magic About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Technology as Magic Richard Stivers,Peter Stirk,2001-08-01 What gives the mass media particularly advertising and television their extraordinary power over our lives so that even the most jaded and sophisticated among us are troubled and fascinated by their allure The secret according to Richard Stivers in this brilliant new book lies in the curious relationship between technology and magic Stivers argues the two are now related to one another in such a way that each has taken on important characteristics of the other His contention is that our expectations for technology have become magical to the point that they have generated a multitude of imitation technologies that function as magical practices These imitation technologies flourish in the fields of psychology management administration and the mass media and their paramount purpose in human adjustment and control Advertising and television programs in particular contain the key magical rituals of our civilization In a fascinating analysis of television programming Stivers shows how various genres news sports game shows soap operas sitcoms etc have their distinct mythological symbols Through dramatized information they symbolically connect consumer goods and services to desired outcomes the utopian goals of success happiness and health thus enveloping technology both real and imitation in a magical cocoon
