Making a Living, Making a Difference Maria Ågren,2016-11-01 What do people do all day What did women and men do to make a living in early modern Europe and what did their work mean As this book shows the meanings depended both on the worker and on the context With an innovative analytic method that is yoked to a specially built database of source materials this book revises many received opinions about the history of gender and work in Europe The applied verb oriented method finds the work verbs that appear incidentally in a wide variety of early modern sources and then analyzes the context in which they appear By tying information technologies and computer assisted analysis to the analytic powers both quantitative and qualitative of professional historians the method gets much closer to a participatory observation of the micro patterns of early modern life than was once believed possible

This book directly addresses a number of broad problems often debated by historians of gender and early modern Europe First it discusses the problem of assessing more accurately the incidence character and division of work Second it analyzes the configurations of work and human difference Third it deals with the extent to which work practices created notions of difference gender difference but also other forms of difference and conversely to what extent work practices contributed to notions of sameness and gender convergence Finally it studies the impact of processes of change Drawing on sources from Sweden the authors show the importance of multiple employment the openness of early modern households the significance of marriage and marital status the gendered nature of specific tasks and the ways in which state formation and commercialization were entangled in people s everyday lives

Schools Making a Difference Martin Thrupp,1999-05-16

Does an effective school really come about through the actions of teachers and school leaders or does it also require an advantaged student intake This question reflects a longstanding research debate about whether or not the social class mix of a school s student intake has much effect on individual achievement *Schools Making a Difference Let s Be Realistic* presents new evidence which suggests that school mix is likely to be important because of the way many school processes are deeply influenced by student intake characteristics Low socioeconomic schools face numerous intake related constraints which make them highly resistant to improvement efforts By suggesting that failing schools are often overwhelmed rather than ineffective this book provides a sympathetic reappraisal of the performance of teachers and school leaders in such schools It also offers a critical response to the often unrealistic claims of the school effectiveness and school improvement movement and a fresh critique of market reforms in education
