**Notes:** An unlimited number of EM800SLAVE can be connected to an EM400A3P. However, the total length of the remote wire used to interconnect all of the EM800SLAVE should not exceed 50 metres.

Max load	1 dimmer per plate	400W	400VA	8	300VA	6	X	X

	3 or more dimmers per plate	300W	300VA	8	200VA	6	X	X

#### Notes:

- In the case of dimmable compact fluorescent or dimmable LED without transformer, this is the maximum number of lamps.
- Wirewound transformers must be Class B efficiency or better. Inferior transformers may cause the over-temperature protection feature to operate due to their high core losses.
- Where both max power and max number of transformers/lamps are specified, both conditions must be satisfied.
- When used in ambient temperatures greater than 25°C, the dimmer must be de-rated by 10% for every increase of 5°C.

#### Operation:

- A short button press turns the dimmer on and off. When turned on, the dimmer will ramp up to the same brightness level as when it was last turned off.
- A long button press will cause the dimmer brightness to go up or down. When dimming up, dimming will stop when maximum brightness is reached, and when dimming down, dimming will stop when minimum brightness is reached. Release the button and then hold down again to change the dimming direction.
- Over-temperature protection:** If the dimmer gets too hot (due to overloading or insufficient de-rating), the lamp brightness is automatically reduced. After the dimmer cools down, normal operation is automatically resumed.
- Short-circuit protection:** If the dimmer receives a short circuit or surge (due to faulty wiring or lamp failure), it automatically turns itself off before damage can occur. Simply press the push-button to resume operation.

#### Advanced Features:

- Kickstart Mode** will turn the lamp on at full brightness for a fraction of a second whenever the dimmer is turned on, before returning to normal brightness. Many compact fluorescent and LED lamps require this, or they will not turn on at low brightness. In addition, as these lamps often have a reduced dimming range, the dimming rate during a long press is slower in Kickstart Mode. To activate see Advanced Programming Mode.
- Minimum/Maximum Brightness** can be set by the user. See Advanced Programming Mode.
