**Embedded Systems: An Integrated Approach** LyLa B. Das, 2012. Embedded Systems: An Integrated Approach is exclusively designed for the undergraduate courses in electronics and communication engineering as well as computer science engineering. This book is well structured and covers all the important processors and their applications in a sequential manner. It begins with a highlight on the building blocks of the embedded systems, moves on to discuss the software aspects and new processors, and finally concludes with an insightful study of important applications. This book also contains an entire part dedicated to the ARM processor, its software requirements, and the programming languages. Relevant case studies and examples supplement the main discussions in the text.
