Garner,2017-09-01 This book explores the nature and importance of sound in virtual reality VR Approaching the subject from a holistic perspective the book delivers an emergent framework of VR sound This framework brings together numerous elements that collectively determine the nature of sound in VR from various aspects of VR technology to the physiological and psychological complexities of the user to the wider technological historical and sociocultural issues Garner asks amongst other things what is the meaning of sound How have fictional visions of VR shaped our expectations for present technology How can VR sound hope to evoke the desired responses for such an infinitely heterogeneous user base This book if for those with an interest in sound and VR who wish to learn more about the great complexities of the subject and discover the contemporary issues from which future VR will surely advance Cyberbullying and the Wild, Wild Web J.A. Hitchcock,2016-12-16 The world has changed drastically over the past decade The Internet has had a huge part in that as it has made the world more accessible to anyone of any age race or gender Used for entertainment education shopping dating and more the internet has provided a whole new virtual world for everyone to enjoy But with the good also comes the bad

and for kids and teens these days the bad has becomes a constant threat from cyberbullies and cyberstalking J A Hitchcock began to have an interest in cyberstalking and cyberbullies in 1996 when she blew the whistle on a literary agency scam They stole her identity and began posting messages online pretending to be her and that was only the beginning of a barrage of threats When she contacted local police they had never had an internet related case and couldn t help her so she taught herself how to track down online criminals how to handle the situation and how to stay safer online After 10 years of being a victim her cyberstalkers were brought to justice Unfortunately not all internet crime stories end with a happy ending Really anyone of any age can become the target of a cyberbully And quite honestly victims are getting younger and younger every year when it comes to being cyberbullied Throughout Cyberbullying and the Wild Wild Web Hitchcock explains how someone can become victim to cyberbullying and how they can stay safer online Offering victims and parents the chance to be able to relate to and truly understand the unfortunate reality of cyberbullying through real life examples of what happened to someone who had been through a similar situation For much needed practical advice from an expert who truly understands the threat of cybercrime this is a must have resource to combat the ever growing problem of internet crime in our society
