   HTTP Programming Recipes for C# Bots Jeff Heaton,2007 The Hypertext Transfer Protocol HTTP allows information to be exchanged between a web server and a web browser C allows you to program HTTP directly HTTP programming allows you to create programs that access the web much like a human user would These programs which are called bots can collect information or automate common web programming tasks This book presents a collection of very reusable recipes for C bot programming This book covers many topics related to C HTTP programming Both secure and insecure HTTP communications are covered as well as HTTP authentication Learn to interact with HTTP forms and support both HTTP POST and HTTP GET requests Collect data from a wide array of HTML constructs such as tables and lists Learn about advanced topics that complicate the life of a bot such as AJAX and Javascript Also learn about the ethical use of bots and when bots should not be used This book also introduces the Heaton Research Spider The Heaton Research Spider is an open source spider framework Using the Heaton Research Spider you can create spiders that will crawl a web site much like a real spider crawls the web The Heaton Research Spider is available in both Java and Microsoft Dot Net form   *Scripting Recipes for Second Life* Jeff Heaton,2007 Heaton gives readers common terms from the Linden Scripting Language that can be utilized in Second Life an Internet based virtual world where residents can explore meet other residents socialize and participate in individual and group activities Computer Books Games   *Robot Learning* Suraiya Jabin,2010-08-12 Robot Learning is intended for one term advanced Machine Learning courses taken by students from different computer science research disciplines This text has all the features of a renowned best selling text It gives a focused introduction to the primary themes in a Robot learning course and demonstrates the relevance and practicality of various Machine Learning algorithms to a wide variety of real world applications from evolutionary techniques to reinforcement learning classification control uncertainty and many other important fields Salient features Comprehensive coverage of Evolutionary Techniques Reinforcement Learning and Uncertainty Precise mathematical language used without excessive formalism and abstraction Included applications demonstrate the utility of the subject in terms of real world problems A separate chapter on Anticipatory mechanisms of human sensory motor coordination and biped locomotion Collection of most recent research on Robot Learning   *Cognitive Computing Recipes* Adnan Masood,Adnan Hashmi,2019-03-27 Solve your AI and machine learning problems using complete and real world code examples Using a problem solution approach this book makes deep learning and machine learning accessible to everyday developers by providing a combination of tools such as cognitive services APIs machine learning platforms and libraries Along with an overview of the contemporary technology landscape Machine Learning and Deep Learning with Cognitive Computing Recipes covers the business case for machine learning and deep learning Covering topics such as digital assistants computer vision text analytics speech and robotics process automation this book offers a comprehensive toolkit that you can apply quickly and easily in your own projects With its focus on Microsoft Cognitive

Services offerings you ll see recipes using multiple different environments including TensowFlow and CNTK to give you a broader perspective of the deep learning ecosystem What You Will Learn Build production ready solutions using Microsoft Cognitive Services APIs Apply deep learning using TensorFlow and Microsoft Cognitive Toolkit CNTK Solve enterprise problems in natural language processing and computer vision Discover the machine learning development life cycle from formal problem definition to deployment at scale Who This Book Is For Software engineers and enterprise architects who wish to understand machine learning and deep learning by building applications and solving real world business problems

Simultaneous Localization and Mapping for Mobile Robots: Introduction and Methods Fernández-Madrigal, Juan-Antonio,2012-09-30 As mobile robots become more common in general knowledge and practices as opposed to simply in research labs there is an increased need for the introduction and methods to Simultaneous Localization and Mapping SLAM and its techniques and concepts related to robotics Simultaneous Localization and Mapping for Mobile Robots Introduction and Methods investigates the complexities of the theory of probabilistic localization and mapping of mobile robots as well as providing the most current and concrete developments This reference source aims to be useful for practitioners graduate and postgraduate students and active researchers alike   Bots Nick Monaco,Samuel Woolley,2022-05-10 Bots automated software applications programmed to perform tasks online have become a feature of our everyday lives from helping us navigate online systems to assisting us with online shopping Yet despite enabling internet users bots are increasingly associated with disinformation and concerning political intervention In this ground breaking book Monaco and Woolley offer the first comprehensive overview of the history of bots tracing their varied applications throughout the past sixty years and bringing to light the astounding influence these computer programs have had on how humans understand reality communicate with each other and wield power Drawing upon the authors decade of experience in the field this book examines the role bots play in politics social life business and artificial intelligence Despite bots being a fundamental part of the web since the early 1990s the authors reveal how the socially oriented ones continue to play an integral role in online communication globally especially as our daily lives become increasingly automated This timely book is essential reading for students and scholars in Media and Communication Studies Sociology Politics and Computer Science as well as general readers with an interest in technology and public affairs   **Intermediate Robot Building** David Cook,2010-08-13 For readers of Robot Building for Beginner Apress 2002 and 2009 welcome to the next level Intermediate Robot Building Second Edition offers you the kind of real world knowledge that only renowned author David Cook can offer In this book you ll learn the value of a robot heartbeat and the purpose of the wavy lines in photocells You ll find out what electronic part you should sand You ll discover how a well placed switch can help a robot avoid obstacles better than a pair of feelers And you ll avoid mistakes that can cause a capacitor to explode Want a robot that can explore rooms follow lines or battle opponents in mini sumo This book presents step by step instructions and circuit and part descriptions so that you can build the robot featured

in the book or apply the modules to your own robot designs Finally you ll find the complete schematics for Roundabout a room explorer that requires no programming and uses only off the shelf electronics With Roundabout you ll use many of the same techniques used by professional robotics engineers and you ll experience many of the same challenges and joys they feel when a robot comes to life   Intelligent Robotics Systems: Inspiring the NEXT Kairuddin Omar,Md. Jan Nordin,Prahlad Vadakkepat,Anton Satria Prabuwono,Siti Norul Huda Sheikh Abdullah,Jacky Baltes,Shamsudin Mohd Amin,Wan Zuha Wan Hassan,Mohammad Faidzul Nasrudin,2013-08-16 This book constitutes the refereed proceedings of the 16th FIRA Robo World Congress FIRA 2013 held in Kuala Lumpur Malaysia in August 2013 The congress consisted of the following three conferences 5th International Conference on Advanced Humanoid Robotics Research ICAHRR 5th International Conference on Education and Entertainment Robotics ICEER and 4th International Robotics Education Forum IREF The 38 revised full papers presented were carefully reviewed and selected from 112 submissions They cover various topics related to the technical developments and achievements in the field of robotics   **Culture and Human-Robot Interaction in Militarized Spaces** Julie Carpenter,2016-02-26 Explosive Ordnance Disposal EOD personnel are some of the most highly trained people in the military with a job description that spans defusing unexploded ordnance to protecting VIP s and state dignitaries EOD are also one of the first military groups to work with robots every day These robots have become an increasingly important tool in EOD work enabling people to work at safer distances in many dangerous situations Based on exploratory research investigating interactions between EOD personnel and the robots they use this study richly describes the nuances of these reciprocal influences especially those related to operator emotion associated with the robots In particular this book examines the activities processes and contexts that influence or constrain everyday EOD human robot interactions what human factors are shaping the robotic technology and how people and culture are being changed by using it The findings from this research have implications for future personnel training and the refinement of robot design considerations for many fields that rely on critical small group communication and decision making skills   **Handbook of Research on Big Data Storage and Visualization Techniques** Segall, Richard S.,Cook, Jeffrey S.,2018-01-05 The digital age has presented an exponential growth in the amount of data available to individuals looking to draw conclusions based on given or collected information across industries Challenges associated with the analysis security sharing storage and visualization of large and complex data sets continue to plague data scientists and analysts alike as traditional data processing applications struggle to adequately manage big data The Handbook of Research on Big Data Storage and Visualization Techniques is a critical scholarly resource that explores big data analytics and technologies and their role in developing a broad understanding of issues pertaining to the use of big data in multidisciplinary fields Featuring coverage on a broad range of topics such as architecture patterns programing systems and computational energy this publication is geared towards professionals researchers and students seeking current research and application topics on the subject

Advances in Cooperative Control and Optimization Michael Hirsch,Panos M. Pardalos,Robert Murphey,Don Grundel,2007-10-24 Across the globe the past several years have seen a tremendous increase in the role of cooperative autonomous systems The field of cooperative control and optimization has established itself as a part of many different scientific disciplines The contents of this hugely important volume which adds much to the debate on the subject are culled from papers presented at the Seventh Annual International Conference on Cooperative Control and Optimization held in Gainesville Florida in January 2007   **Developing Enterprise Chatbots** Boris Galitsky,2019-04-04 A chatbot is expected to be capable of supporting a cohesive and coherent conversation and be knowledgeable which makes it one of the most complex intelligent systems being designed nowadays Designers have to learn to combine intuitive explainable language understanding and reasoning approaches with high performance statistical and deep learning technologies Today there are two popular paradigms for chatbot construction 1 Build a bot platform with universal NLP and ML capabilities so that a bot developer for a particular enterprise not being an expert can populate it with training data 2 Accumulate a huge set of training dialogue data feed it to a deep learning network and expect the trained chatbot to automatically learn how to chat Although these two approaches are reported to imitate some intelligent dialogues both of them are unsuitable for enterprise chatbots being unreliable and too brittle The latter approach is based on a belief that some learning miracle will happen and a chatbot will start functioning without a thorough feature and domain engineering by an expert and interpretable dialogue management algorithms Enterprise high performance chatbots with extensive domain knowledge require a mix of statistical inductive deep machine learning and learning from the web syntactic semantic and discourse NLP ontology based reasoning and a state machine to control a dialogue This book will provide a comprehensive source of algorithms and architectures for building chatbots for various domains based on the recent trends in computational linguistics and machine learning The foci of this book are applications of discourse analysis in text relevant assessment dialogue management and content generation which help to overcome the limitations of platform based and data driven based approaches Supplementary material and code is available at https github com bgalitsky relevance based on parse trees   Chatbots and Human-Centered AI Asbjørn Følstad,Symeon Papadopoulos,Theo Araujo,Effie L.-C. Law,Ewa Luger,Sebastian Hobert,Petter Bae Brandtzaeg,2025-04-03 This book constitutes the refereed proceedings of the 8th International Workshop on Chatbots and Human Centered AI CONVERSATIONS 2024 held in Thessaloniki Greece during December 4 5 2024 The 12 full papers and 3 short papers were carefully reviewed and selected from 35 submissions They were organized in topical sections as follows Understanding and Designing for Human AI Interactions Human Centred AI in Education and Social Support Conversational AI for Citizens and Customers   **Robots in Academic Libraries: Advancements in Library Automation** Iglesias, Edward,2013-04-30 In recent years automation has played a vital role in library systems that handle tasks of acquisition cataloging serials and circulation The automation of these operations has in turn minimized the demand for human interaction Robots in Academic

Libraries Advancements in Library Automation provides an overview on the current state of library automation addresses the need for changing personnel to accommodate these changes and assesses the future for academic libraries as a whole This book is essential for library leaders technology experts and library vendors interested in the future of library automation and its impact on the decline of human interaction in libraries   Mobile Robot: Motion Control and Path Planning Ahmad Taher Azar,Ibraheem Kasim Ibraheem,Amjad Jaleel Humaidi,2023-06-30 This book presents the recent research advances in linear and nonlinear control techniques From both a theoretical and practical standpoint motion planning and related control challenges are key parts of robotics Indeed the literature on the planning of geometric paths and the generation of time based trajectories while accounting for the compatibility of such paths and trajectories with the kinematic and dynamic constraints of a manipulator or a mobile vehicle is extensive and rich in historical references Path planning is vital and critical for many different types of robotics including autonomous vehicles multiple robots and robot arms In the case of multiple robot route planning it is critical to produce a safe path that avoids colliding with objects or other robots When designing a safe path for an aerial or underwater robot the 3D environment must be considered As the number of degrees of freedom on a robot arm increases so does the difficulty of path planning As a result safe pathways for high dimensional systems must be developed in a timely manner Nonetheless modern robotic applications particularly those requiring one or more robots to operate in a dynamic environment e g human robot collaboration and physical interaction surveillance or exploration of unknown spaces with mobile agents etc pose new and exciting challenges to researchers and practitioners For instance planning a robot s motion in a dynamic environment necessitates the real time and online execution of difficult computational operations The development of efficient solutions for such real time computations which could be offered by specially designed computational architectures optimized algorithms and other unique contributions is thus a critical step in the advancement of present and future oriented robotics   **Robots in K-12 Education: A New Technology for Learning** Barker, Bradley S.,Nugent, Gwen,Grandgenett, Neal,Adamchuk, Viacheslav I.,2012-02-29 This book explores the theory and practice of educational robotics in the K 12 formal and informal educational settings providing empirical research supporting the use of robotics for STEM learning Provided by publisher   **Git Recipes** Wlodzimierz Gajda,2014-01-20 Whether you re relatively new to git or you need a refresher or if you just need a quick handy reference for common tasks in git Git Recipes is just the reference book you need With recipes to cover any task you can think of including working with GitHub and git on BitBucket Git Recipes shows you how to work with large repositories new repositories forks clones conflicts differences and it even gives you practical scenarios you may find yourself dealing with while using git If you work with Git at all you need this hands on practical reference for all things Git   **Training and Enhancing Executive Function** Gian Marco Marzocchi,Maria Carmen Usai,Steven J. Howard,2020-10-27 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least

ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin org about contact **Robotics and Mechatronics** Richard (Chunhui) Yang,Yukio Takeda,Chunwei Zhang,Gu Fang,2019-07-01 This book gathers the proceedings of the ISRM 2017 the fifth IFToMM International Symposium on Robotics and Mechatronics which was jointly organised by the School of Computing Engineering and Mathematics at Western Sydney University Australia and by the IFToMM Technical Committee on Robotics and Mechatronics The respective contributions showcase the latest advances trends and future challenges in Computer Modelling and Simulation Kinematics and Dynamics of Multi Body Systems Advanced Dynamics and Control Methods Linkages and Mechanical Controls Parallel Manipulators Mechanism Design Sensors and Actuators Mobile Robotics Navigation and Motion Planning Bio inspired Robotics Micro Nano Robotics and Complex Robotic Systems **Data Intensive Computing Applications for Big Data** Mamta Mittal,Valentina Emilia Balas,D. Jude Hemanth,Raghvendra Kumar,2018-01-15 The book Data Intensive Computing Applications for Big Data discusses the technical concepts of big data data intensive computing through machine learning soft computing and parallel computing paradigms It brings together researchers to report their latest results or progress in the development of the above mentioned areas Since there are few books on this specific subject the editors aim to provide a common platform for researchers working in this area to exhibit their novel findings The book is intended as a reference work for advanced undergraduates and graduate students as well as multidisciplinary interdisciplinary and transdisciplinary research workers and scientists on the subjects of big data and cloud parallel and distributed computing and explains didactically many of the core concepts of these approaches for practical applications It is organized into 24 chapters providing a comprehensive overview of big data analysis using parallel computing and addresses the complete data science workflow in the cloud as well as dealing with privacy issues and the challenges faced in a data intensive cloud computing environment The book explores both fundamental and high level concepts and will serve as a manual for those in the industry while also helping beginners to understand the basic and advanced aspects of big data and cloud computing
