Ahmed Sayed Aboraya,2022-07-15 The SCIP manual will introduce a new assessment tool designed to be compatible with
21st century advances in measurement base care MBC and personalized medicine in psychiatry PMP The SCIP includes 18
clinician administered and 15 self administered reliable and validated scales covering most adult symptom domains anxiety
obsessions compulsions posttraumatic stress depression mania delusions hallucinations disorganized thoughts aggression
negative symptoms alcohol use drug use attention deficit hyperactivity and eating disorders Mental health professionals
psychiatrists psychiatry residents psychologists therapists clinical social workers counselors nurses nurse practitioners
physician assistants professors students and mental health researchers are the primary audience of the manual These
professionals will be able to implement SCIP scales in their practice and use the SCIP psychopathology glossary as part of
the emerging science of personalized medicine psychiatry PMP Existing books on measures and rating scales such as the two
books above describe different scales developed by different authors at different periods Each scale has its own rating
guidelines and training requirements which must be followed by clinicians in order to use the scales This demands a
considerable amount of time for clinicians and can be a barrier to using the scales in practice Even within the same
psychopathology domain many published measurement scales exist For instance the book published by Waters and Stephane
includes 120 scales for psychosis Among the 120 scales for psychosis which scale s should the clinician choose Our proposed
manual will remove these barriers by creating simple and universal principles which allow readers to use the 33 reliable and
validated SCIP scales with most adult psychiatric disorders There will be 15 videotaped interviews available online for
readers who buy the book Readers are expected to watch the interviews in conjunction with reading the manual
