Ugon, B. Séroussi, C. Lovis, 2016-04-12 The current trend in health and social care systems is a shift from care provision to citizen driven health Only a few years ago the high tech devices used in healthcare were limited to health cards and personal portable devices These have since evolved dramatically to include wearables sensors and devices for measuring health values The application of such technologies has for the most part been welcomed by both patients and professionals It is the fact that these devices can be connected to and communicate with other connected devices and systems which has been the game changer in healthcare technology not least because it has empowered and will empower patients to take more control of their own healthcare management This book presents the proceedings of the Special Topic Conference STC of the European Federation for Medical Informatics EFMI held in Paris France in April 2016 The special topic this year is Transforming Healthcare with the Internet of Things The papers are divided into four sections transforming healthcare with the Internet of things societal dimensions of the Internet of things ontology and decision support and clinical information systems and data reuse with a further section for poster presentations The book will be of interest to all those

 Hossain,2016-10-11 The entire capital became isolated from the rest of the country The Red Army tried to create anarchism
 in the US and the entire world It was during this chaotic moment that Anwar and his companions escaped from jail
 Afterwards they formed The Green Army and operated a mission called Operation Survival of USA to save the innocent
 civilians of the nation from this dire situation With minimal support from the US government they had to immobilize the Red
 Army In the meantime there was a misunderstanding between the US and other countries due this chaotic situation which
 could have led to World War III Could the Green Army overcome all of these obstacles and save innocent lives Most
 importantly could the USA survive **The Cognitive, Emotional and Neural Correlates of Creativity** Matthijs

 thought and innovation Human creativity is at the roots of extraordinary achievements in the arts and sciences and enables
 individuals and their groups to adapt flexibly to changing circumstances to manage complex social relations and to survive
 and prosper through social technological and medical innovations The ability to generate novel and potentially useful ideas
 and problem solutions viz creativity is a key driver of human evolution and among the most valued and sought after
 competencies in contemporary societies that struggle with complex problems and compete for technological and economic
 supremacy Because creativity provides fitness functionality in both ancestral and contemporary societies it stands to reason
 that i the human brain evolved to sustain and promote creative thinking and we should be able to identify ii the brain
 circuitries genetic drivers and neurohormonal modulators of the human capacity for creative problem solving and original
 ideation and iii the core cognitive and emotional processes underlying creative thought In this Research Topic we bring
 together a collection of papers to provide an encyclopedic open access snapshot of the current state of the art on the neural
