Communications Infrastructure, Systems and Applications Rashid Mehmood, Eduardo Cerqueira, Radoslaw Piesiewicz, Imrich Chlamtac, 2009-12-12 The First International ICST Conference on Communications Infrastructure Systems and Applications in Europe EuropeComm 2009 was held August 11-13 2009 in London EuropeComm 2009 brought together decision makers from the EU communication top researchers and industry executives to discuss the directions of communications research and development in Europe The event also attracted academia and industry representatives as well as government officials to discuss the current developments and future trends in technology applications and services in the communications field Organizing this conference was motivated by the fact that the development and deployment of future services will require a common global scale infrastructure and therefore it is important that designers and stakeholders from all the systems stacks come together to discuss these developments Rapidly decreasing costs of computational power storage capacity and communication bandwidth have led to the development of a multitude of applications carrying an increasingly huge amount of traffic on the global networking infrastructure What we have seen is an evolution of infrastructure looking for networked applications has evolved into an infrastructure struggling to meet the social technological and business challenges posed by the plethora of bandwidth hungry emerging applications

Wireless and Mobile Networking Jozef Wozniak, Jerzy Konorski, Ryszard Katulski, Andrzej R. Pach, 2009-08-31 Recent spectacular achievements in wireless mobile and sensor networks have dramatically changed our lives in many ways However the rapid evolution of wireless systems not only promises increased functionality reliability availability and security as well as putting a wide variety of new services at the users disposal it also creates a number of design challenges that our research community is now facing Scientists and engineers need to come up with and promptly implement novel wireless network architectures while system operators and planners rethink their business models and attend to the growing expectations of their customer base To provide a suitable forum for discussion between researchers practitioners and industry representatives interested in new developments in the respective research area IFIP WG 6.8 launched three separate series of conferences MWCN Mobile and Wireless Communications Networks PWC Personal Wireless Communications and WSAW Wireless Sensor and Actors Networks In 2008 MWCN and PWC were merged into the IFIP Wireless and Mobile Networking Conference WMNC 2008 held in Toulouse France from September 30 to October 2 2008 WMNC 2008 and PWC 2008 topics were subsequently revised with a view to covering the whole spectrum of hot issues in wireless and mobile networking As a result IFIP WG 6.8 decided to add WSAW as another WMNC track

Computational Collective Intelligence. Semantic Web, Social Networks and Multiagent Systems Ryszard Kowalczyk, 2009-09-23 Computational collective intelligence CCI is most often understood as a subfield of artificial intelligence AI dealing with soft computing methods that enable group decisions to be made or knowledge to be processed among autonomous units acting in distributed environments The needs for CCI techniques and tools have grown significantly

recently as many information systems work in distributed environments and use distributed resources Web based systems social networks and multi agent systems very often need these tools for working out consistent knowledge states resolving conflicts and making decisions Therefore CCI is of great importance for today s and future distributed systems

Methodological theoretical and practical aspects of computational collective intelligence such as group decision making collective action coordination and knowledge integration are considered as the form of intelligence that emerges from the collaboration and competition of many individuals artificial and or natural The application of multiple computational intelligence technologies such as fuzzy systems evolutionary computation neural systems consensus theory etc can support human and other collective intelligence and create new forms of CCI in natural and or artificial systems

Mobile Lightweight Wireless Systems Fabrizio Granelli,Charalabos Skianis,Yang Xiao,Simone Redana,2009-08-10 The First International Conference on Mobile Lightweight Systems MOBILIGHT was held in Athens during May 18 20 2009 The decision to organize a scientific event on wireless communications where competition is really enormous was motivated by discussions with some colleagues about the current unprecedented request for lightweight wireless communication devices with high usability and performance able to support added value services in a highly mobile environment Such devices follow the user everywhere he she goes at work at home while travelling in a classroom etc but also result in exciting search development and business opportunities Such a scenario clearly demands significant upgrades to the existing communication paradigm in terms of infrastructure devices and services to support the anytime anywhere any device philosophy introducing novel and fast evolving requirements and expectations on research and development in the field of information and communication technologies The core issue is to support the desire of wireless users to have 24 7 network availability and transparent access to their own services

Advances in Intelligent Information and Database Systems Ngoc Thanh Nguyen, Radoslaw Katarzyniak, 2010-04-09 Intelligent information and database systems are two closely related and we established subfields of modern computer science They focus on the integration of artificial intelligence and classic database technologies in order to create the class of next generation information systems The major target of this new generation of systems is to provide end users with intelligent behavior simple and or advanced learning problem solving uncertain and certain reasoning self organization cooperation etc Such intelligent abilities are implemented in classic information systems to make them autonomous and user oriented in particular when advanced problems of multimedia information and knowledge discovery access retrieval and manipulation are to be solved in the context of large distributed and heterogeneous environments It means that intelligent knowledge based information and database systems are used to solve basic problems of large collections management carry out knowledge

discovery from large data collections reason about information under uncertain conditions support users in their for lation of complex queries etc Topics discussed in this volume include but are not limited to the foundations and principles of data information and knowledge models methodologies for intelligent information and database systems analysis design implementation validation maintenance and evolution

Mobile Networks and Management Kostas Pentikousis, Oliver Blume, Ramon Agüero, Symeon Papavassiliou, 2010-02-17 The First International ICST Conference on Mobile Networks and Management MONAMI was held in Athens Greece during October 13 14 2009 hosted by the National Technical University of Athens Through what we hope will be a long lasting series of events this new international conference aims at bringing together top searchers academics and practitioners specializing in the area of mobile network management Multiaccess and resource management mobility management and n work management have emerged as core topics in the design deployment and ope tion of current and future networks Yet they are treated as separate isolated domains with very little interaction between the experts in these fields and lack cro pollination MONAMI 2009 offered the opportunity to leading researchers industry professionals and academics to meet and discuss the latest advances in these areas and present results related to technologies for true plug and play networking efficient use of all infrastructure investments and access competition MONAMI 2009 featured eight full papers and five short papers which were lected after a thorough peer review process based on their relevance to the scope of the conference and their technical merit The overall acceptance rate was 50% The contributing authors covered a range of topics in mobile networks and their mana ment that are currently of high interest in the wireless research area

Mobile Wireless Middleware, Operating Systems, and Applications Ying Cai, Thomas Magedanz, Minglu Li, Jinchun Xia, Carlo Giannelli, 2010-11-30 The advances in wireless communication technologies and the proliferation of mobile devices have enabled the realization of intelligent environments for people to c municate with each other interact with information processing devices and receive a wide range of mobile wireless services through various types of networks and systems everywhere anytime A key enabler of this pervasive and ubiquitous connectivity environments is the advancement of software technology in various communication sectors ranging from communication middleware and operating systems to networking protocols and applications The international conference series on Mobile Wireless Middleware Operating Systems and Applications MOBILWARE is dedicated to address emerging topics and challenges in various mobile wireless software related areas The scope of the conference includes the design implementation deployment and evaluation of middleware operating systems and applications for computing and communications in mobile wireless systems MOBILWARE 2010 was the third edition of this conference which was made p sible thanks to the sponsorship of ICST and Create Net and most importantly the hard work of the TPC and reviewers Similar to the last successful editions we had 35 submissions from 23 different countries this year reflecting the international interest for the conference topics After a thorough review process we finalized an excellent technical program including 18 regular papers and 4 short papers

Virtual, Augmented and Mixed Reality Stephanie Lackey, Jessie Chen, 2017-06-28 This book constitutes the refereed proceedings of the 9th International Conference on Virtual Augmented and Mixed Reality VAMR 2017 held as part of HCI International 2017 in Vancouver BC Canada HCII 2017 received a total of 4340 submissions of which 1228 papers were accepted for publication after a careful reviewing process The 45 papers presented in this volume were organized in topical sections named developing virtual and augmented environments interaction techniques in VAMR VAMR in education and training virtual worlds and games user experience in VAMR and health issues in VR *Virtual Reality Technology* Grigore C.
