Living in the Landscape Arnold Berleant,1997 In *Living in the Landscape* Arnold Berleant explores new ways of thinking about how we live and might live in the landscapes that enfold us Through the concepts of aesthetic engagement and environmental continuity he proposes a new paradigm that offers a holistic approach to the meaning of place and places of meaning in our lives Although environmental aesthetics is linked in the popular mind to dramatic vistas and monumental landscapes the Grand Canyon for example Berleant is much more concerned with the commonplace settings of everyday life He argues that our active appreciation of or aesthetic engagement with the prosaic landscapes of home work local travel and recreation plays a vital role in our discovery of hidden continuities as well as pleasure and meaning in the places we inhabit

Berleant begins with a general introduction to environmental aesthetics identifying the kinds of experience meanings and values it involves and describing its historical sources and the issues with which it is concerned In the rest of the book he spotlights new directions in the field as they relate to education community creativity and the sacred and provides an insightful analysis of negative environmental aesthetics Throughout he is both thoughtful and entertaining as evidenced in his extended critique of the pop post modern environment of Disney World Berleant addresses issues commonly associated with the environmental movement e g preservation pollution control and quality of life But his study draws from a wide range of disciplines and for that reason should also appeal to scholars and students interested in art and aesthetics landscape architecture and planning urban and environmental design and cultural geography as well as environmental studies
