Modern in the Middle Susan Benjamin, Michelangelo Sabatino, 2020-09-01 The first survey of the classic twentieth century houses that defined American Midwestern modernism Famed as the birthplace of that icon of twentieth century architecture the skyscraper Chicago also cultivated a more humble but no less consequential form of modernism the private residence *Modern in the Middle Chicago Houses 1929-75* explores the substantial yet overlooked role that Chicago and its suburbs played in the development of the modern single family house in the twentieth century In a city often associated with the outsize reputations of Frank Lloyd Wright and Ludwig Mies van der Rohe the examples discussed in this generously illustrated book expand and enrich the story of the region's built environment Authors Susan Benjamin and Michelangelo Sabatino survey dozens of influential houses by architects whose contributions are ripe for reappraisal such as Paul Schweikher Harry Weese Keck Keck and William Pereira From the bold early example of the Battledock House by Henry Dubin 1930 to John Vinci and Lawrence Kenny's gem the Freeark House 1975 the generation spanning residences discussed here reveal how these architects contended with climate and natural setting while negotiating the dominant influences of Wright and Mies They also reveal how residential clients typically middle class professionals progressive in their thinking helped to trailblaze modern architecture in America Though reflecting different approaches to site space structure and materials the examples in *Modern in the Middle* reveal an abundance of astonishing houses that have never been collected into one study until now

The Architectural Models of Theodore Conrad Teresa Fankhänel,2021-06-17 Based on the recent discovery of his fully preserved private archive models photos letters business files and drawings this book tells the story of

Theodore Conrad 1910 1994 the most prominent and prolific architectural model maker of the 20th century Conrad's innovative models were instrumental in the design and realization of many icons of American Modernism from the Rockefeller Center to Lever House and the Seagram Building He revolutionized the production of architectural models and became a model making entrepreneur in his own right Yet despite his success and the well known buildings he helped to create until now little has been known about Conrad's work and his impact on 20th century architectural history With exclusive access to Conrad's archive as well as that of model photographer Louis Checkman both of which have lain undiscovered in private storage for decades this book examines Conrad's work and legacy accompanied by case studies of his major commissions and full color photographs of his works Set against the backdrop of the surge in model making in the 1950s and 1960s which Jane Jacobs called The Miniature Boom it explores how Conrad's models prompt broader scholarly questions about the nature of authorship in architecture the importance of craftsmanship and about the translation of architectural ideas between different media The book ultimately presents an alternative history of American modern architecture highlighting the often overlooked influence of architectural models and their makers *California Design, 1930-1965 Living In a Modern Way* Wendy Kaplan, 2011 The first comprehensive examination of California's mid century modern design generously illustrated In 1951 designer Greta Magnusson Grossman observed that California design was not a superimposed style but an answer to present conditions It has developed out of our own preferences for living in a modern way California design influenced the material culture of the entire country in everything from architecture to fashion This generously illustrated book which accompanies a major exhibition at the Los Angeles County Museum of Art is the first comprehensive examination of California's mid century modern design It begins by tracing the origins of a distinctively California modernism in the 1930s by such European migrants as Richard Neutra Rudolph Schindler and Kem Weber it finds other specific design influences and innovations in solid color commercial ceramics inspirations from Mexico and Asia new schools for design training new concepts about leisure and the conversion of wartime technologies to peacetime use exemplified by Charles and Ray Eames's plywood and fiberglass furniture The heart of California Design is the modern California home famously characterized by open plans conducive to outdoor living The layouts of modernist homes by Pierre Koenig Craig Ellwood and Raphael Soriano for example were intended to blur the distinction between indoors and out Homes were furnished with products from Heath Ceramics Van Keppel Green and Architectural Pottery as well as other previously unheralded companies and designers Many objects were designed to be multifunctional pool and patio furniture that was equally suitable indoors lighting that was both task and ambient bookshelves that served as room dividers and bathing suits that would turn into ensembles appropriate for indoor entertainment California Design includes 350 images most in color of furniture ceramics metalwork architecture graphic and industrial design film textiles and fashion and ten incisive essays that trace the rise of the California design aesthetic of wartime technologies to peacetime use exemplified by Charles and Ray

Understanding Modern Andrew Weaving, Lisa Freedman, 2003 Written for those who want to live in a modern way but not necessarily in a modern home this book explains the concepts behind the modern movement It aims to bring classic buildings to life and by identifying the trademarks of the great Modern designers demonstrates how modern can be achieved in contemporary interiors Trousdale Estates Steven M. Price, 2017-01-10 Filled with beautiful vivid photographs Trousdale is the definitive history of the architecture and design that defined both Beverly Hills and the ultimate American Dream Trousdale Estates is a 410 acre enclave of large luxurious homes in Beverly Hills California Primarily developed in the

1950s and 60s it quickly became famous for its concentration of celebrity residents and the unrestrained extravagance of its midcentury modern architecture. Often working with unlimited budgets, these designers created sprawling elegant backdrops for the ultimate expression of the American Dream in the mid to late twentieth century. In *Trousdale Price* explores the architectural backgrounds, details, and floor plans of the amazing homes, giving readers an inside view of the world famous Beverly Hills style. Lavish new photography is interspersed with archival and historic images illustrating the glamour of Trousdale both then and now. Some of the architects of Trousdale include Lloyd Wright, Wallace Neff, Paul R. Williams, Harold Levitt, and A. Quincy Jones. *Ultramodern* Liz O'Brien, 2007. Biography of Chicago based architect Samuel Marx.

American Glamour and the Evolution of Modern Architecture Alice T. Friedman, 2010. Alice Friedman argues that the aesthetics of mid 20th century modern architecture reflect an increasing fascination with glamour, a term used in those years to characterise objects, people, experiences as luxurious, expressive, even magical. **ID**, 2006. **Catalog of the Library of the Museum of Modern Art: A Museum of Modern Art** (New York, N.Y.). Library, 1976. *The Architect's Newspaper*, 2006. *ICAM Print*, 2007. *NorCalMod* Pierluigi Serraino, 2006-08-03. Many people think modernist architecture never flowered in California north of the San Fernando Valley. *NorCalMod* dispels that notion in a copiously illustrated history showcasing extraordinary examples of its proud contribution to the Bay Area and environs. As a style, modernist architecture was hotly debated in its day: why create modern structures where such distinctive Victorian and Arts and Crafts buildings already existed, pulling heavyweights such as Frank Lloyd Wright, Lewis Mumford, and Walter Gropius into the fray? Ultimately, that existing Bay Region Style would remain the area's architectural hallmark, but not before hundreds of important modernist projects, many still standing yet unjustly neglected today, had been established. The remarkable photos in this book open our eyes to a long lost chapter in the history of California architecture and make *NorCalMod* a volume to be enjoyed by those interested in California history and style as well as by architecture students and professionals. **Modern Women: Women Artists at The Museum of Modern Art** Alexandra Schwartz, 2010. This text examines the collection of feminist art in the Museum of Modern Art. It features essays presenting a range of generational and cultural perspectives. **Journal of the Society of Architectural Historians** Society of Architectural Historians, 1999. Includes special issues.
