 and Leadership in Sustainable Development Chris Maser, 1998-08-18 Effective leadership or lack of it makes a critical
 difference in the conception implementation and endurance of community endeavors In his travels as an environmental
 consultant and lecturer Chris Maser has seen the dilemma many times I have taken part in so called community visioning
 processes in which it was patently clear that the people conducting the process knew nothing about a vision or how to create
 one It has been my experience that the vast majority of people cannot lead because they do not know what the inner qualities
 of leadership are Vision and Leadership in Sustainable Development explores the seldom considered philosophical basis
 behind the models and methods of leadership pointing the way to the essential qualities it takes to establish a shared vision
 of community life Divided into two parts shared vision and leadership Maser explores numerous issues and considerations to
 cultivate well rounded leadership and provide a more substantive blueprint for local activism As with the previous and
 forthcoming volumes in the Sustainable Community Development series Maser recognizes the increasing importance of local
 communities to take charge of the issues most directly affecting the environment **Kitchen Table Sustainability** Wendy
 Sarkissian, Nancy Hofer, Yollana Shore, Steph Vajda, Cathy Wilkinson, 2012-05-04 Kitchen Table Sustainability offers a unique
 view of sustainability through the lens of community engagement It takes sustainability out of the ivory towers of universities
 government departments and planners to the kitchen tables of the world This practical guide distils decades of wisdom from
 community planning engagement and sustainability practice internationally into a user friendly and engaging book that is
 both inspirational and packed with hands on tools The core of the book is a bottom up approach to participatory community
 engagement and development referred to as EATING that consists of six components Education Action Trust Inclusion
 Nourishment and Governance **Hope and Hard Times** Ted Bernard, 2010-01-01 Successes and speed bumps on the road
 to sustainable communities Global Sustainability and Communities of Practice Carl A. Maida, Sam Beck, 2018-03-28
 Collaboration between experts and the public is vital for effective community engagement aimed at improving the lives of the
 most vulnerable in society whether at the local or global level Using case based and theoretical chapters that examine rural
 and urban communities of practice this volume illustrates how participatory researchers and students as well as policy and

community leaders find ways to engage with the broader public when it comes to global sustainability research and practice

Sustainable Communities and Green Lifestyles Tendai Chitewere, 2017-08-09 Sustainable communities raise questions about the compatibility of capitalism and environmentalism and how we can green our way of life in a capitalist economy that values short term production and consumption over long term conservation and simple living If capitalism and its drive towards consumption has produced social and environmental degradation is it the best medium to identify solutions Sustainable Communities and Green Lifestyles examines one ecovillage as it attempts to create a sense of community while reducing its impact on the natural environment Through extensive participant observation the book demonstrates how ecovillages are immersed within a larger discourse of class race and lifestyle choices highlighting the inseparability of environmental sustainability and social justice Sustainable communities are confronted by the contradictions of green consumption and must address social inequality or risk focusing inward on personal green consumerism creating mere green havens for the few who can afford to live in them This book cautious of redirecting environmentalist efforts away from structural solutions and onto personal environmentalism offers a critical perspective on the challenges of an emerging green lifestyle This book offers a critical perspective on the direction of US environmentalism and contributes to debates in environmental studies anthropology and urban planning
