Borderline Alexander Kriss, PhD, 2024-04-30 An intimate compassionate and expansive portrait of Borderline Personality Disorder that rejects the conventional wisdom that this condition is untreatable told by a psychologist who specializes in BPD Mental illness is heavily stigmatized within our society and within this already marginalized group folks with BPD are deemed especially untreatable and hopeless When as a graduate student Alex Kriss first began working as a therapist in the field his supervisors warned him that borderline patients were manipulative difficult and had a tendency to drop out of treatment Yet years later when Kriss was establishing his private practice and a borderline patient known as Ana came to his office he felt compelled to try to help her despite all of the warnings he'd heard *Borderline* is the story of his work with Ana how his successes with her led him to open his doors to other BPD patients and advocate for them *Borderline* is also the story of the disorder itself Kriss traces accounts of the condition going back to antiquity showing

how this disease has been known by many names over the millennia most of them gendered possession hysteria witchcraft moral insanity All referred to a person usually a woman whose behavior and personality were seen as fractured unstable unpredictable and uncontrollable Kriss guides us through this history up through the emergence of psychotherapy the development of the modern diagnosis and attitudes toward treatment today *Essentials for Practice of Medicine in the Frontline* Inyang Ukot,2020-10-30 *Essentials for practice of medicine in the frontline* is an abridged synthesis of selected topics from family medicine internal medicine pediatrics obstetrics and gynecology pathology and psychiatry also ophthalmology otorhinolaryngology hematology and dermatology Each section covers ten salient and commonly encountered areas of practice by physicians Multiple choice questions and answers accompany each Section The setting of writing is a developing country The contents are relevant to doctors who practice in the medically advanced countries and those in the developing countries Medically the world has become an interesting place Air travel frequent movement and resettlement of people now mean that doctors in developed countries can no longer stay and practice within the clinical conditions that were typical in their practice settings Things have changed as they cannot be certain of what medical conditions that patients from various parts of the world will present to them Doctors also cannot be unequivocal that an emergency in a distant part of the globe may not require their attention This book therefore meets the needs of doctors irrespective of their length of practice or where they practice What applies to doctors certainly applies to medical students This book is an atypical book as it puts in its two volumes of less than 500 pages of 8 5 x 11 per volume material that any doctor anywhere should keep on their office or consulting room bookshelf The e book version is also a veritable companion
