Psychology at the Movies Skip Dine Young,2012-04-09

Psychology at the Movies explores the insights to be gained by applying various psychological lenses to popular films including cinematic depictions of human behavior the psychology of filmmakers and the impact of viewing movies Uses the widest range of psychological approaches to explore movies the people who make them and the people who watch them Written in an accessible style with vivid examples from a diverse group of popular films such as *The Silence of the Lambs* *The Wizard of Oz* *Star Wars* *Taxi Driver* *Good Will Hunting* and *A Beautiful Mind* Brings together psychology film studies mass communication and cultural studies to provide an interdisciplinary perspective Features an extensive bibliography for further exploration of various research fields *Cinema of Simulation: Hyperreal Hollywood in the Long 1990s* Randy

Laist,2016-09-22 Hyperreality is an Alice in Wonderland dimension where copies have no originals simulation is more real than reality and living dreams undermine the barriers between imagination and objective experience The most prominent philosopher of the hyperreal Jean Baudrillard formulated his concept of hyperreality throughout the 1980s but it was not until the 1990s that the end of the Cold War along with the proliferation of new reality bending technologies made hyperreality seem to come true In the lost decade between the fall of the Berlin Wall and 9 11 the nature of reality itself became a source of uncertainty a psychic condition that has been recognizably recorded by that seismograph of American consciousness Hollywood cinema The auteur cinema of the 1970s aimed for gritty realism and the most prominent feature of Reagan era cinema was its fantastic unrealism Clinton era cinema however is characterized by a prevailing mood of hyperrealism communicated in various ways by such benchmark films as *JFK* *Pulp Fiction* and *The Matrix* The hyperreal cinema of the 1990s conceives of the movie screen as neither a window on a preexisting social reality realism nor as a wormhole into a fantastic dream dimension escapism but as an arena in which images and reality exchange masks blend into one another and challenge the philosophical premises which differentiate them from one another *Cinema of Simulation* *Hyperreal Hollywood in the Long 1990s* provides a guided tour through the anxieties and fantasies reciprocally social and cinematic which characterize the surreal territory of the hyperreal **The Art of 3D Computer Animation and Effects**

Timeline of America Floyd Orr,2006 Godzilla Stuffed into a Briefcase Columbus takes a vacation to The Bahamas and discovers the area to be a fun place He tells all his other adventurous friends about it and they decide they all need vacations too Soon everybody in The Old Country is loading up enough beer to make the trip and sailing to The Bahamas Hysterical events have surprised us inventions have made us more comfortable and recreational pursuits have all but dominated our lives The story of America is told in a pair of Jekyll Hyde Timelines You will meet the good doctor inside His mean ugly brother will arrive in 2008 This is a lot more than a pop culture trivia book although no simpler phrase describes it Ten timelines tell the story of America s development from the arrival of Columbus to the homeruns of Barry Bonds and the movie release of The Da Vinci Code The story is separated into ten topics events comforts cars toys movies television music nerds sports and gossip Like any competent trivia book there is a test at the end but this tale is about the quest not the grail This is a capsule history of the things that have defined us and Godzilla doesn t like being so tightly restrained

Violence Toby Miller,2020-10-22 Using discourses from across the conceptual and geographical board Toby Miller argues for a different way of understanding violence one that goes beyond supposedly universal human traits to focus instead on the specificities of history place and population as explanations for it Violence engages these issues in a wide ranging interdisciplinary form examining definitions and data psychology and ideology gender nation states and the media by covering several foundational questions how has violence been defined historically and geographically has it decreased or increased over time which regions of the world are the most violent does violence correlate with economies political systems and religions what is the relationship of gender and violence what role do the media play This book is a powerful introduction to the study of violence ideal for students and researchers across the human sciences most notably
