Thomas, Adam D.K. King, Andrew Jackson, 2025-05-30 Over the last several decades the workplace in Canada has experienced profound changes Work has become increasingly insecure for a growing number of workers and income inequality has deepened New technologies have reshaped labour processes and have enhanced elements of employer control over work and workers Entry into the labour market is itself a difficult process as young workers struggle to match qualifications and credentials with jobs while for many older workers retirement with a secure income is a diminishing prospect The demographic composition of the labour market is transforming yet this change is conditioned by longstanding patterns of inequality in terms of gender race disability and immigration status Work and Labour in Canada explores the changing world of work mapping out major trends and patterns that define working life and identifying the economic social and political factors that shape the contemporary workplace Evaluating working conditions and the quality of jobs from a critical perspective this text presents an analysis of recent trends in employment and unemployment as well as outlines the role and impact of unions and other workers organizations The fourth edition includes a new chapter on work and technology updated statistical data and additional content on the basic income debate labour and climate change and COVID 19 This thoroughly revised and updated edition is essential for teachers researchers labour activists and students of labour studies sociology political science political economy and economic geography programs **Workers' Inquiry and Global Class Struggle** Robert Ovetz, 2020-10-20 Rumours of the death of the global labour movement have been greatly exaggerated Rising from the ashes of the old trade union movement workers struggle is being reborn from below By engaging in what Karl Marx called a workers inquiry workers and militant co researchers are studying their working conditions the technical composition of capital and how to recompose their own power in order to devise new tactics strategies organisational forms and objectives These workers inquiries from call centre

workers to teachers and adjunct professors are re energising unions bypassing unions altogether or innovating new forms of workers organisations In one of the first major studies to critically assess this new cycle of global working class struggle Robert Ovetz collects together case studies from over a dozen contributors looking at workers movements in China Mexico the US South Africa Turkey Argentina Italy India and the UK The book reveals how these new forms of struggle are no longer limited to single sectors of the economy or contained by state borders but are circulating internationally and disrupting the global capitalist system as they do

The Precarious Migrant Worker Panos Theodoropoulos, 2025-06-13 Migrant workers in the West are at the frontline of the precarious condition that is coming to dominate social and economic life in neoliberal societies Yet despite the highly insecure and exploitative working conditions they routinely face labour mobilizations by precarious workers are rare In this immersive portrait of the daily realities of precarious migrant labour Panos Theodoropoulos found work in Glasgow s warehouses factories and kitchens to uncover the ways that precarity is lived and contested Connecting the realms of structure subjectivity and culture his analysis shows that precarity not only dictates workers labour conditions but socializes them in an individualist survival oriented struggle that erodes solidarities and enforces its own neoliberal logic Crucially however precarity and the wider neoliberal culture are unable to erase workers material awareness and experience of class injustice This points to the possibility of forging strong connections and methods of resistance firmly grounded in the lives and communities of precarious workers Blending interviews ethnographic notes and social theory *The Precarious Migrant Worker* offers a unique glimpse into our increasingly precarious social reality and will be a valuable resource for scholars students and activists interested in issues of migration precarity and resistance

Immigrant and Migrant Workers Organizing in Canada and the United States Jorge Frozzini, Alexandra Law, 2017-11-08 Across Canada and the United States immigrant workers face important obstacles at work and in the broader society whether their immigration status is temporary permanent or nonexistent Hyper precarious workers of all status groups and their allies in unions and worker centers are organizing to improve their conditions In this book Jorge Frozzini and Alexandra Law two longtime volunteers with a Canadian worker center draw on their own experience in depth

interviews and academic work from the fields of law communication studies and social movement theory to produce a tactically focused theoretically informed introduction to immigrant worker organizing in a neoliberal era Frozzini and Law describe the phenomenon of employment precarity in the context of U S and Canadian labor history explaining how union certification and collective bargaining function under the law Without directing activists toward any single best strategy they cover tactical and ethical questions raised when organizers offer casework as a recruitment and research tool The royalties from this book will go to the Immigrant Workers Centre Montreal [The Routledge Handbook of the Gig Economy](#)

Immanuel Ness,2022-10-31 Research on the growth of the precarious economy is of significant interest as the economy increasingly becomes dependent on gig work However as platform and automated service work has grown there remains a chasm in understanding the key aspects of digital labour This handbook presents comprehensive theoretical empirical and historical accounts of the political economy of informal work from the late 20th century to the present It examines the rich and varied analysis and critique of the informalisation of work focusing on its most significant theories intellectual traditions and authors It highlights the political social cultural and developmental impact of the deterioration of employment in the Global North and Global South as well as the extreme threat posed to the planet by the growth of contingent work poverty and enduring and increasing inequalities produced and reproduced by the reformation of capitalism in the contemporary age of neoliberal capitalism The period from the 1980s to the present is marked by the expanded extraction of surplus value from workers through the creation of non standard jobs and the restructuring of work A central component of the restructuring of work is the extension of gig employment through the development of algorithmic platforms which direct labourers to perform discrete tasks This is a definitive collection representing the primary reference work contributing to our understanding of the subject The book is written and presented in a clear manner accessible to scholars and researchers of international political economy labour economics and sociology who are eager for new research examining this phenomenon as well as specialists in the field of labour relations Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Funded by the University of Amsterdam

The World Turned Upside Down? Greg Albo,Leo Panitch,2018-12-24 A World Turned Upside Down poses two

overarching questions for the new period opened by the Trump election and the continued growth of right wing nationalisms Is there an unwinding of neoliberal globalization taking place or will globalization continue to deepen but still deny the free cross border movement of labor Would such an unwinding entail an overall shift in power and accumulation to specific regions of the Global South that might overturn the current world order and foster the disintegration of the varied regional blocs that have formed These questions are addressed through a series of essays that carefully map the national class racial and gender dimensions of the state capitalism and progressive forces today Sober assessment is crucial for the left to gain its political bearings in this trying period and the uncertainties that lie ahead **The Cost of Free Shipping** Jake

Allowed Award for Ethnography 2017 Winner of the 2016 Labor History Best Book prize Over a million people in the UK work in call centres and the phrase has become synonymous with low paid and high stress work dictatorial supervisors and an enforced dearth of union organisation However rarely does the public have access to the true picture of what goes on in these institutions For Working the Phones Jamie Woodcock worked undercover in a call centre to gather insights into the

everyday experiences of call centre workers He shows how this work has become emblematic of the shift towards a post industrial service economy and all the issues that this produces such as the destruction of a unionised work force isolation and alienation loss of agency and ominously the proliferation of surveillance and control which affects mental and physical well being of the workers By applying a sophisticated radical analysis to a thoroughly international 21st century phenomenon *Working the Phones* presents a window onto the methods of resistance that are developing on our office floors and considers whether there is any hope left for the modern worker today

Migration Beyond Capitalism Hannah Cross,2020-09-29 Harshly exploited migrant labour plays a fundamental role in the political economy of contemporary capitalism The abstract and utopian theorising of many liberals and leftists on the migration question often ignores or downplays patterns of displacement and brutal class dynamics which divide and weaken working people while empowering the ruling class In this important new book Hannah Cross provides a sober analysis of the class antagonisms of migration in the context of the nation social democracy and the racialized ordering of the world Bringing Marxist methodology and strategy to a careful analysis of existing emancipatory movements she sets out the programmes and approaches that are needed to promote global worker solidarity and create a future in which cheap labour is no longer a mainstay of wealthy economies This focus on the labouring classes allows her to identify some important new directions for migration in a world beyond capitalism exploitation and injustice This book will be essential reading for students scholars and general readers interested in the politics and political economy of migration in a world unhelpfully caught between racist authoritarian capitalism and the wishful thinking of contemporary left liberalism

The Crisis-Mobility Nexus Leandros Fischer,2024-01-08 Situated at the intersections of anthropology migration citizenship and social movement studies this volume theorises a crisis mobility nexus by focusing on empirical case studies These concern migration struggles the entanglements of crisis social mobility and citizenship as well as the impact of COVID 19 im mobility on social movements By highlighting examples from these streams the book illuminates entanglements between them while emphasising the role of solidarity as well as de solidarisation in creating shaping or resisting various regimes of mobility
