## **Justice And Natural Resources Concepts Strategies And Applications:**

**Justice and Natural Resources** Kathryn Mutz, Gary Bryner, Douglas Kenney, 2002 Just over two decades ago research findings that environmentally hazardous facilities were more likely to be sited near poor and minority communities gave rise to the environmental justice movement Yet inequitable distribution of the burdens of industrial facilities and pollution is only half of the problem poor and minority communities are often denied the benefits of natural resources and can suffer disproportionate harm from decisions about their management and use Justice and Natural Resources is the first book devoted to exploring the concept of environmental justice in the realm of natural resources Contributors consider how decisions about the management and use of natural resources can exacerbate social injustice and the problems of disadvantaged communities Looking at issues that are predominantly rural and western many of them involving Indian reservations public lands and resource development activities it offers a new and more expansive view of environmental justice The book begins by delineating the key conceptual dimensions of environmental justice in the natural resource arena Following the conceptual chapters are contributions that examine the application of environmental justice in natural resource decision making Chapters examine how natural resource management can affect a range of stakeholders quite differently distributing benefits to some and burdens to others the potential for using civil rights laws to address damage to natural and cultural resources the unique status of Native American environmental justice claims parallels between domestic and international environmental justice how authority under existing environmental law can be used by Federal regulators and communities to address a broad spectrum of environmental justice concerns Justice and Natural Resources offers a concise overview of the field of environmental justice and a set of frameworks for understanding it It expands the previously urban and industrial scope of the movement to include distribution of the burdens and access to the benefits of natural resources broadening environmental justice to a truly nationwide concern

From the Inside Out Jill Lindsey Harrison, 2019-10-29 An examination of why government agencies allow environmental injustices to persist Many state and federal environmental agencies have put in place programs policies and practices to redress environmental injustices and yet these efforts fall short of meeting the principles that environmental justice activists have fought for In From the Inside Out Jill Lindsey Harrison offers an account of the bureaucratic culture that hinders regulatory agencies attempts to reduce environmental injustices It is now widely accepted that America's poorest communities communities of color and Native American communities suffer disproportionate harm from environmental hazards with higher exposure to pollution and higher incidence of lead poisoning cancer asthma and other diseases linked to environmental ills And yet Harrison reports some regulatory staff view these problems as beyond their agencies area of concern requiring too many resources or see neutrality as demanding color blind administration Drawing on more than 160 interviews with interviewees including 89 current or former agency staff members and more than 50 environmental justice activists and others who interact with

regulatory agencies and more than 50 hours of participant observation of agency meetings both open and closed door Harrison offers a unique account of how bureaucrats resist undermine and disparage environmental justice reform and how environmental justice reformers within the agencies fight back by trying to change regulatory practice and culture from the inside out Harrison argues that equity not just aggregated overall improvement should be a metric for evaluating environmental regulation

**Unraveling Emotions in Environmental Movements and Green Politics** Efser Rana Coşkun, 2025-07-29 This book offers an interesting synthesis of Social Movements Studies and International Relations IR focusing on emotions The holistic scope and the different conceptualizations of emotions in environmental movements will bring a new perspective that expands the existing approaches of Social Movements Studies and IR Although the existing literature on emotions in social movements offers rich insights the detailed analytical framework of emotions in environmental movements is overlooked In particular the realm of emotions and their intricate interaction with environmental activism remains overlooked in the context of Green Politics By building on significant studies in emotions in IR this book aims to transcend the boundaries of state centric discussions to create a platform for the manifestation of social movements

**Energy, Governance and Sustainability** Jordi Jaria i Manzano, Nathalie Chalifour, Louis J. Kotzé, 2016-05-27 In summary the book provides an interesting mix of energy topics and perspectives that appears somewhat eclectic at first glance the book is a very useful and scholarly addition to the literature on energy governance and is recommended reading for all those who need to be better informed on the challenges and some of the solutions available at the current time David Grinlinton Journal of Energy Natural Resources Law This timely book makes an original and in depth contribution to the debate about how to transform our energy governance systems into ones that support a fair safe and sustainable society It combines perspectives from leading scholars to provide a global outlook on alternative approaches to energy governance and innovative experiences Taken as a whole it offers a unique overview of some of the innovative and novel ways in which law can support the shift to sustainable and equitable energy systems The first section lays the conceptual and theoretical foundations for alternative approaches to energy governance including its constitutional foundations the role of human rights and an environmentally just system that seeks universal access to energy for all The second section showcases concrete innovative experiences in energy governance from around the globe including smart cities the role of the courts energy efficiency of buildings and the harnessing of energy from waste Finally the authors consider the social justice dimension discussing the exploitation of energy resources by multinational companies in developing countries and the importance of agricultural production distribution and consumption in energy transformation This unique overview of state of the art approaches to transformation of energy governance is vital reading for policy makers and both legal and non legal scholars concerned with energy law sustainability and justice and global governance Contributors K Bosselmann J Bowie N Chalifour E Daly T Daya Winterbottom C Derani A Guerry J Jaria I Manzano L Kotz E Le Gal L Lin Heng M Low J R May E C Okonkwo R

Smith, 2020-06-02 Dispute System Design walks readers through the art of successfully designing a system for preventing managing and resolving conflicts and legally framed disputes Drawing on decades of expertise as instructors and consultants the authors show how dispute systems design can be used within all types of organizations including business firms nonprofit organizations and international and transnational bodies This book has two parts the first teaches readers the foundations of Dispute System Design DSD describing bedrock concepts and case chapters exploring DSD across a range of experiences including public and community justice conflict within and beyond organizations international and comparative systems and multi jurisdictional and complex systems This book is intended for anyone who is interested in the theory or practice of DSD who uses or wants to understand mediation arbitration court trial or other dispute resolution processes or who designs or improves existing processes and systems      **Nigerian Yearbook of International Law 2017** Chile Eboe-Osuji, Engobo Emeseh, 2018-05-12 This book is the inaugural edition of the Nigerian Yearbook of International Law The Yearbook is a necessary and timely publication that provides a forum for critical discourse on developments in international law particularly where this has relevance for Nigeria Africa and its people including those in the diaspora The articles in this first volume explore topics under the following themes International Law and Regional Systems Contemporary Challenges Emerging Issues Criminal Law and Natural Resources Environmental Law There is also a section which provides a comprehensive review of key decisions in African and International Courts Tribunals Contributors to this edition are international law jurists from across the world including eminent judges of international tribunals leading academics and an international diplomat      *Resisting Global Toxics* David Naguib Pellow, 2007-08-10 Examines the export of hazardous wastes to poor communities of color around the world and charts the global social movements that challenge them Every year nations and corporations in the global North produce millions of tons of toxic waste Too often this hazardous material inked to high rates of illness and death and widespread ecosystem damage is exported to poor communities of color around the world In *Resisting Global Toxics* David Naguib Pellow examines this practice and charts the emergence of transnational environmental justice movements to challenge and reverse it Pellow argues that waste dumping across national boundaries from rich to poor communities is a form of transnational environmental inequality that reflects North South divisions in a globalized world and that it must be theorized in the context of race class nation and environment Building on environmental justice studies environmental sociology social movement theory and race theory and drawing on his own research interviews and participant observations Pellow investigates the phenomenon of global environmental inequality and considers the work of activists organizations and networks resisting it He traces the transnational waste trade from its beginnings in the 1980s to the present day examining global garbage dumping the toxic pesticides that are the legacy of the Green Revolution in agriculture and today s scourge of dumping and remanufacturing high tech and electronics products The

rise of the transnational environmental movements described in *Resisting Global Toxics* charts a pragmatic path toward environmental justice human rights and sustainability      Reinventing Eden Carolyn Merchant,2013-03-12 This revised edition of Carolyn Merchant's classic *Reinventing Eden* has been updated with a new foreword and afterword Visionary quests to return to the Garden of Eden have shaped Western Culture This book traces the idea of rebuilding the primeval garden from its origins to its latest incarnations and offers a bold new way to think about the earth      **The Ecological Life** Jeremy Bendik-Keymer,2006-01-26 Written as a series of lectures *The Ecological Life* offers a humanistic perspective on environmental philosophy that challenges some of the dogmas of deep ecology and radical environmentalism while speaking for their best desires The book argues that being human centered leaves us open to ecological identifications rather than the opposite Bendik Keymer draws on analytic and continental traditions of philosophy as well as literature and visual media He argues for a sense of ecological justice consonant with human rights and shows how humanistic thinking is committed to deepening respect for life and our ecological orientation In a clear jargon free and conversational tone *The Ecological Life* presents a timely and important contribution to civic engagement in an ecological century      *Access, Labor, and Wild Floral Greens Management in Western Washington's Forests* ,      **General Technical Report PNW-GTR** ,2003      **Deceiving (dis)appearances** Harlan Koff,2007 The impact of recent shifts in global geopolitics and economic markets has led to the reconceptualization of national borders Scholars have shifted their analysis away from the narrow idea of borders and moved their attention towards the wider view of borderlands border regions and border zones thus leading to the conceptual redefinition of border politics These recent approaches have identified border areas as socially constructed territories that demonstrate many of the characteristics of independent polities Border communities seem to have come to life creating a degree of autonomy and separation from central state actors While the rich literature in border studies identifies important changes in local political and economic systems it does not necessarily identify the mechanisms that create these changes Why has integration occurred in some border regions while others are being reinforced Why has integration failed in some cases where opportunity structures are positive while it has succeeded in others saddled with more limited constraints The essays in this volume address such fundamental questions      *Water Ethics* Neelke Doorn,2019-10-25 While the interdependence of the different aspects of water security and the relevance of ethical and distributive aspects is acknowledged in both policy circles and academia a comprehensive introduction to water ethics is still missing This book aims to fill that gap by exploring the common thread that follows from three current interrelated debates the allocation of water resources the human right to water and the commodification and privatisation of water services These questions create a plea for alternatives to the predominantly consequentialist approach to dealing with water issues The author explores the normative and ethical aspects of flood and water related risks and looks at the topic of responsibility who should be responsible for correcting inequities or taking remedial action in the case of pollution These and other questions to be

linked to ongoing discussion in other disciplines within philosophy such as environmental ethics climate ethics the ethics of technology and climate justice making this text important across a wide range of courses for upper undergraduate and graduate students

**Linking Activism** Morgan Gardner, 2013-09-13 This book a unique examination of the activist striving to work for more holistic social change creates a conceptual framework to give visibility to the complexity of activist practice that spans environmental and social justice concerns

**Agrarian Dreams** Julie Guthman, 2004-08-04 Agrarian Dreams throws a cold shower of reality over the dream of organic agriculture in California demonstrating all that is lost when organic farming goes industrial This is a challenging book and until we can answer the hard questions Julie Guthman poses a genuinely sustainable agriculture will elude us Michael Pollan author of The Botany of Desire A Plant's Eye View of the World Agrarian Dreams puts organic agriculture in a broad intellectual social and theoretical context in a readable way Nobody has written at this scale and scope about organics The availability of this basic data and interpretation will open discussion to a broad range of citizens scholars and decision makers This is an outstanding work Sally K Fairfax Henry J Vaux Distinguished Professor of Forest Policy University of California Berkeley Guthman takes on the sacred cow of organic agriculture that farmers and consumers can transform our food system simply through by adopting new philosophies of eating farming and nature With an analysis that is at the forefront of agrarian theory today she shows that organic farmers no matter what their philosophy have to work under the economic gun of markets and land prices As a result organic growers in California are forced to become increasingly industrialized unjust and unhealthy Her analysis is proof that it will take more than new kinds of thinking to create sustainability in our food system
