Critical Voices in Teacher Education Barry Down, John Smyth, 2012-04-28 We live in dangerous times when educational policies and practices are debated largely in terms of how they fit with the needs of the free market This volume is a collection of writing by teacher educators that draws on their unique biographies experiences and perspectives to denounce these misguided norms It explores what it means practically and intellectually to

teach for social justice in conservative times In a globalised world where the power of capital holds sway the purposes of social institutions such as universities and schools is being refashioned in ways that are markedly instrumental and technicist in nature The consequence is that teachers work is increasingly constrained by regimes of control such as standardised testing accountability transparency and national curricula In the meantime large numbers of students and teachers are disengaging physically emotionally and intellectually from learning The contributors to this edited volume present both a powerful critique of these developments and a counter hegemonic vision of teacher education founded on the principles and values of social justice democracy and critical inquiry Teacher education they argue involves a commitment to critical intellectual work that subjects some deeply entrenched assumptions beliefs habits routines and practices to closer scrutiny The contributing authors expose how ideology and power operate in seemingly blameless rational ways to perpetuate social hierarchies based on class gender sexuality race and culture

Theory, Justice, and Social Change Christopher R. Williams, Bruce A. Arrigo, 2012-09-22 Throughout history social and intellectual crises have given rise to compelling suggestions for reform steeped in various progressive sensibilities For example within the discipline of criminology particularly during the 1980's and 1990's a number of unconventional theoretical perspectives emerged that sought to challenge many of the assumptions embedded within its own mainstream discourse and to propose alternative solutions for meaningful sustainable change Conceived of as critical in overarching orientation these efforts to rethink the foundations of criminological verstehen can be traced to several specific theoretical and methodological strands of inquiry e.g. anarchism peacemaking chaos theory postmodernism Though distinct

in some respects these emerging models are linked paradigmatically by their shared discontent with conventional criminological thought and by their radicalized posture toward existing and previously unexamined epistemic crises Collectively this is an agenda for reform that seeks to establish a more humane and just social order particularly as citizens and society confront the institutional and communal problems posed by crime delinquency and deviance Theory Justice and Social Change Theoretical Integrations and Critical Applications represents a provocative series of essays that systematically reviews or extends the role of critical social theory in fostering justice and change in several relevant though problematic social contexts Mindful of the need to address both conceptual exegeses and pragmatic concerns the articles contained in this volume grapple with the ongoing double crisis that confronts theory and practice in the construction of knowledge By appropriating and integrating various insights from several heterodox and critically animated lines of inquiry each chapter deftly exposes where and how conventional sociological and criminological thought has failed to effectively address such human social issues as homelessness mental illness minority rights juvenile justice global violence and criminal punishment In doing so Theory Justice and Social Change provides new and much needed direction regarding theory development in the social sciences and indicates why charting such a course of theory action yields more enlightened prospects for justice and change in society and in our lives
