

Also because a lot of my work was of pieces of art work were not at eye level they were high I also had to use the cloning tool and copy tool so that I could edit out part of buildings that got in the way or people who had only half a body had to be removed but I could sometimes do this just by cropping the image this removed any unwanted attention in the pictures. Overall I enjoyed the editing of the pictures just wish I could've spent a little longer on it as there were a few minor details like lighting that you would've liked to be changed.

### Target audience

I won't have reached my original target audience as it was to do with a sports documentary however highlighting the points of something that needs to have more recognition than what it does so I still hope that somewhat resonates still with my audience but my change in project did lead me to change my focus group for when I was gathering feedback through survey monkey, I made them aware that they were not the original target audience but they were for the new project.

Burnham's passion for her subject matter is evident, revealing how her personal and professional journeys conspired to illuminate Morgan's impact on American equestrian history. This book is highly recommended for anyone interested in the origins of horse breeding in America or the intersection of agriculture and American cultural identity.
