Pocket Manual brings together the official manuals and information that enabled the Allies to fight in Burma Malaya Thailand

Indochina Singapore and the Pacific Islands and win the war During the Second World War British and American soldiers

were sent to new and challenging theatres fighting to survive not only encounters with the enemy but the landscape they

found themselves in Being posted to South East Asia and the Pacific to fight the Japanese meant soldiers had to learn to

survive in the tropics fighting and living in endless steamy jungle and perilous swamps In this environment men had to be

able to take care of themselves rather than relying on their unit to supply their needs something which did not come

naturally to the many soldiers born and raised in cities To help them in this completely alien environment the British and US

armies produced a number of official training manuals and guides to explain to the men how to identify and fight the

Japanese and avoid their deadly panji traps but also jungle lore how to find and cook plants that were safe to eat which

animals and insects could kill them how to identify and treat tropical illnesses and diseases and avoid the dangers of polluted

water and cannibals The Jungle Survival Pocket Manual brings together the official manuals and information that enabled the Allies to fight in Burma Malaya Thailand Indochina Singapore and the Pacific Islands and win the war Clothbound and presented in the Pool of London Press retro styling this volume will appeal to those interested in the South East Asian and Pacific theatres of WWII as well as those researching their family history It makes a unique gift for all those interested in survival techniques and those of travelling to Asia 20 diagrams and drawings reproduced from the original guides

SAS Jungle Survival Barry Davies, 2013-01-08 When we think of jungles we often think of a densely forested area with thick foliage this is what is known as a primary jungle But jungles can also include swamps grasslands and cultivated areas Primary jungles can fall into the category of either a tropical rain forest or a deciduous forest depending on the types of trees and plants found growing there A tropical rain forest is typified by having tall trees whose upper branches interlock to form canopies Yet of all the environments in which man has to survive the jungle offers the best chance The SAS have operated in the jungle for years sometimes staying in the forest for months at a time They developed a technique whereby they had two sets of clothing one for daytime use and one for night Just before they went to sleep they would change from their wet clothing which was normally hung under the shelter to dry out In the morning they would change from their dry clothing and put on the wet It is an uncomfortable change but one that guaranteed a good night s sleep in dry clothing The SAS Guide to Jungle Survival will teach the reader to come to terms with the jungle environment understand it and work with it as opposed to fighting it The jungle forest can provide shelter food and water in abundance and this book will show you how If the jungle offers any problems it is with disease and wild animals The SAS Guide to Jungle Survival will show you how to avoid and resist both and come out alive *The Survival Handbook* Colin Towell, 2020-03-24 Take on the toughest challenges that nature can throw at you with the ultimate visual guide to camping wilderness and outdoor survival skills Written by Colin Towell an ex SAS Combat Survival Instructor The Survival Handbook is bursting with survival tips manual skills camping essentials and advice on how to improvise survive and get found on land or at sea Combining proven no nonsense military
