Requirements Engineering: Foundation for Software Quality Roel Wieringa, Anne Persson, 2010-06-16 This volume compiles the papers accepted for presentation at the 16th Working Conference on Requirements Engineering Foundation for Software Quality REFSQ 2010 held in Essen during June 30 and July 1 2 2010 Since 1994 when the first REFSQ took place requirements engineering RE has never ceased to be a dominant factor influencing the quality of software systems and services Initially started as a workshop the REFSQ working conference series has now established itself as one of the leading international forums to discuss RE in

its many relations to quality. It seeks reports of novel ideas and techniques that enhance the quality of RE products and processes as well as reflections on current research and industrial RE practices. One of the most appreciated characteristics of REFSQ is that of being a highly interactive and structured event. REFSQ 2010 was no exception to this tradition. In all we received a healthy 57 submissions. After all submissions had been carefully assessed by three independent reviewers and went through electronic discussions, the Program Committee met and finally selected 15 top quality full papers, 13 research papers and 2 experience reports and 7 short papers, resulting in an acceptance rate of 38 %. The work presented at REFSQ 2009 continues to have a strong anchoring in practice with empirical investigations spanning over a wide range of application domains.

Agile Processes in Software Engineering and Extreme Programming Casper Lassenius, Torgeir Dingsøyr, Maria Paasivaara, 2015-05-15. This book contains the refereed proceedings of the 16th International Conference on Agile Software Development XP 2015 held in Helsinki, Finland, in May 2015. While agile development has already become mainstream in industry, this field is still constantly evolving and continues to spur an enormous interest both in industry and academia. The XP conference series has always played and continues to play an important role in connecting the academic and practitioner communities, providing a forum for both formal and informal sharing and development of ideas, experiences and opinions. The theme of XP 2015, Delivering Value: Moving from Cyclic to Continuous Value Delivery, reflects the modern trend towards organizations that are simultaneously very efficient and flexible in software development and delivery. The 15 full and 7 short papers accepted for XP 2015 were selected from 44 submissions. All of the submitted papers went through a rigorous peer review process. Additionally, 11 experience reports were selected from 45 proposals, and in each case the authors were shepherded by an experienced researcher.
