Justice And Fairness In International Negotiation Cambridge Studies In International Relations:

Justice and Fairness in International Negotiation Cecilia Albin, 2001-03-15 International negotiations have become an increasingly widespread feature of international affairs as the number of parties involved have grown and regional and global fora have multiplied Cecilia Albin examines the role of considerations of justice and fairness in these negotiations She argues that negotiators do not simply pursue their narrow interests or those of their countries but regularly take principles of justice and fairness into account These principles come into play at an early stage as talks are structured and agendas set in the bargaining process itself and in the implementation of and compliance with agreements The analysis is based on cases in four important areas the environment international trade ethnic conflict the Israeli Palestinian conflict and arms control Drawing on a mass of empirical data including a large number of interviews this book relates the abstract debate over international norms and ethics to the realities of international relations *Justice, Community and Dialogue in International Relations* Richard Shapcott, 2001-11-08 Shapcott investigates the question of justice in a culturally diverse world asking if it is possible to conceive of a universal or cosmopolitan community in which justice to difference is achieved Justice to difference is possible according to Shapcott by recognising the particular manner in which different humans identify themselves Such recognition is most successfully accomplished through acts of communication and in particular conversation The accounts of understanding developed by H G Gadamer provide a valuable way forward in this field The philosophical hermeneutic account of conversation allows for the development of a level of cosmopolitan solidarity that is both thin and universal and which helps to provide a more just resolution of the tension between the values of community and difference Students and scholars of international relations international ethics and philosophy will be interested in this original study **Handbook of International Relations** Walter Carlsnaes, Thomas Risse, Beth A Simmons, 2012-09-18 The original Handbook of International Relations was the first authoritative and comprehensive survey of the field of international relations In this eagerly awaited new edition the Editors have once again drawn together a team of the world's leading scholars of international relations to provide a state of the art review and indispensable guide to the field ensuring its position as the pre eminent volume of its kind The Second Edition has been expanded to 33 chapters and fully revised with new chapters on the following contemporary topics Normative Theory in IR Critical Theories and Poststructuralism Efforts at Theoretical Synthesis in IR Possibilities and Limits International Law and International Relations Transnational Diffusion Norms Ideas and Policies Comparative Regionalism Nationalism and Ethnicity Geopolitics in the 21st Century Terrorism and International Relations Religion and International Politics International Migration A truly international undertaking this Handbook reviews the many historical philosophical analytical and normative roots to the discipline and covers the key contemporary topics of research and debate today The Handbook of International Relations remains an essential benchmark publication for all advanced undergraduates graduate students and academics in politics and international relations **Justice and Peace**

Lindemann, Erik Ringmar, 2015-11-17 The origins of international conflict are often explained by security dilemmas power rivalries or profits for political or economic elites Common to these approaches is the idea that human behaviour is mostly governed by material interests which principally involve the quest for power or wealth The authors question this truncated image of human rationality Borrowing the concept of recognition from models developed in philosophy and sociology this book provides a unique set of applications to the problems of international conflict and argues that human actions are often not motivated by a pursuit of utility maximisation as much as they are by a quest to gain recognition This unique approach will be a welcome alternative to the traditional models of international conflict **Enforcing International Law** Dr Math

Noortmann, 2013-01-28 Until recently the fundamental link between two basic concepts in international law namely the right to self help and the obligation to settle disputes by peaceful means has been neglected in doctrine and practice The main

issue is that international law traditionally recognizes the right of states to safeguard their own rights by resorting to countermeasures as well as the obligation to settle their disputes by accepted and recognized diplomatic and judicial procedures Both concepts are based on their own merits which are assumed to be valid in contemporary international law It is the primary purpose of this study to determine which rules and principles govern the relationship between the two concepts The book s major findings arise from an analysis of scholarly work supported by examples from five different case studies Drawing insights from legal as well as political science it will be a valuable resource for students academics and policy makers in international law international relations and related areas

Ethics and International Relations Joel H. Rosenthal, 2017-03-02 This volume offers a new dimension to realist theories about world politics It questions both the theoretical and empirical foundations of much of traditional realist thought by offering realist oriented analyses that emphasize the possibilities of cooperation and accommodation through agreement over common motivations and concerns The articles in this volume demonstrate that moral considerations can and do play a significant role in shaping state behavior and that despair about the possibility of improving the systems and institutions within which we live is unwarranted Specific points of normative convergence are raised in some detail especially on issues of war membership and authority humanitarian concern and the social consequences of globalization Three ethical concepts form the core of the realism reconsidered argued for here namely the ideas of pluralism rights and fairness

Constructivism in International Relations

Maja Zehfuss,2002-07-25 Maja Zehfuss book offers a fundamental critique of constructivism focusing on the work of Wendt Onuf and Kratochwil Using Germany s shift towards participation in international military operations as an illustration she demonstrates why each version of constructivism fails in its own project and comes apart on the basis of its own assumptions Inspired by Derridean thought this book highlights the political consequences of constructivist representations of reality Each critique concludes that constructivist notions of key concepts are impossible and that this is not merely a question of theoretical inconsistency but of politics The book is premised on the notion that the empirical and the theoretical are less separate than is acknowledged in international relations and must be read as intertwined Zehfuss examines the scholars role in international relations worrying that by looking to constructivism as the future they will be severely curtailing their ability to act responsibly in this area
