Gizmo Warm-up

Have you ever wondered what is in your food? Scientists use a variety of tests to determine the nutritional content of food. You will learn four of those tests with the *Identifying Nutrients Gizmo™*.

1. Below the **Food samples** label, drag tube **A** into the **Food sample holder**. Below the **Benedict test**, click the **Test** button. What is done in the Benedict test?

The food sample and Benedict solution are added to a test tube. The tube is heated in a water bath for five minutes.

2. The Benedict test is a test for **monosaccharides**, simple sugars like glucose or fructose (fruit sugar). In contact with monosaccharides, the Benedict solution turns from blue to pink.

Does **Sample A** contain monosaccharides? **Yes**

Note: **Disaccharides** such as sucrose (table sugar) and lactose (milk sugar) are more complex than monosaccharides. The Benedict test does not detect disaccharides directly.
