Resource Management Thomas Klikauer, 2022-06-17 A Global Guide to Human Resource Management is a concise HRM introductory text offering a uniquely non-region specific approach to people management in international business organisations. The book presents an alternative to standard managerial approaches reflecting the perspectives of multiple stakeholders: workers, trade unions, states, and governments. NGOs critically evaluate HRM in practice and in so doing enable students to make effective decisions in their own practice wherever their careers take them. Its accessibility and concision make it well suited to short courses for non-HRM and non-business specialists. This text covers all major introductory topics for non-specialists: introducing the concept and purpose of HRM through recruitment, people skills, designing work, promoting health, rewarding success, and successful and ethical people management. This edition includes a new chapter on green HRM. Rich with pedagogical features, the book includes five case studies per chapter to connect theory with practice. It is also supported with a range of instructor materials including online guest lectures, general discussion questions, a glossary, an index, and online documentaries that explain how to manage people. It is essential reading for students interested in Human Resources and Personnel Management, Organisational Behaviour and Development, and Workplace Culture. **The Complete Idiot's Guide to MBA Basics** Tom Gorman, 2003 A revised edition of the popular classic, this title features updated topics to build MBA knowledge. Productivity in Ethiopia Dirk J. van Wasbeek, 2004-09-24 This dissertation examines how human resources are managed at selected Ethiopian private companies how Ethiopian human resource management practice is evolving and how it can be improved The examination is qualitative and exploratory since no comparative research on human resource management has yet been conducted at Ethiopian profit or non profit organizations An understanding of Ethiopian human resource management practice makes it possible to improve Ethiopian human resource management practice and thus to increase employee productivity The study took place at four manufacturing and four service companies in Addis Ababa all representative of their sector The research claim is that Ethiopian human resource management practices differ from human resource management practices in the West due to differences in cultural factors economic systems political systems and legal and industrial relations For this reason Ethiopia s culture politics economy and legal and industrial relations have been analyzed The main finding of this study is that the importance of human resource management is not uniformly understood at all the case study companies Although the multinational companies based in Ethiopia see their human resources as the companies most important asset as human capital the local companies generally do not The fact that respondents claim that Ethiopia has limited experience in industrialization might explain why human resource management in Ethiopia is rudimentary and still has a long way to go With this dissertation the researcher wants to contribute to improving Ethiopian human resource management practice Moreover this dissertation may be used as a framework for similar research in other sectors or for more specific in depth research This dissertation may also serve as a knowledge base for company managers business consultants academics and government officials of countries with a national culture similar to Ethiopia s for example Kenya Tanzania and Zambia countries undergoing or which have undergone a recent transition to a free market economy and countries facing similar macro economic developments
