Industrial Employment Information Bulletin, 1929 **Maritime London** Anthony Burton, 2022-09-15 The book looks at London's maritime history from the establishment of Roman Londinium to the present day It discusses many different aspects of life on the Thames and its connecting waterways and canals There was a time when the River Thames was the main highway for the city when watermen plied their trade carrying passengers and goods in a wide variety of craft ranging from rowing boats to sailing barges The Thames was also for many centuries a major ship building centre and the story includes the construction of some iconic vessels from Henry VIII's flagship Henri Grace Dieu to Isambard Brunel's great steamship the SS Great Eastern London was also until recently the country's most important port In the days of sail the Port of London was crowded with vessels and it was not until the nineteenth century that major enclosed docks were built a process that continued into the

early years of the twentieth century The early nineteenth century also saw London connected to the rest of England through a network of canals Other topics covered include the lifeboat service river fire fighting forces and the river police The result is a colorful pageant that highlights the vital role that London s waterways played in the life of the capital *Congressional Record* United States. Congress,1977 *We Just Got on with it* Bette Anderson,1994 Many of the advances made by the women of the late 1980s and 1990s were nothing new to the women of the war years This book takes a broad look at the range of ways in which women served their country during World War II Some made jam with the WI 5 300 tons of it Some flew fighter and bomber planes some felled trees and sawed pit props for the mines and some knitted for the troops Women even ventured to Occupied Europe fell into the hands of the Gestapo and ended up in concentration camps Every woman did what lay within her power **Pacing Mobilities** Vered Amit,Noel B. Salazar,2020-06-11 Turning the attention to the temporal as well as the more familiar spatial dimensions of mobility this volume focuses on the momentum for and temporal composition of mobility the rate at which people enact or deploy their movements as well as the conditions under which these moves are being marshalled represented and contested This is an anthropological exploration of temporality as a form of action a process of actively modulating or responding to how people are moving rather than the more usual focus in mobility studies on where they are heading
