After a PhD on software verification at the University of Liverpool, Jim has combined a successful career in academia with outstanding industry research. In particular, he has been a pioneer in applying mathematical modelling approaches in critical industries. At GEC's Hirst Research Centre, he worked on a novel distributed telephone exchange and a service specification of a PABX exchange. In Oxford, he collaborated with IBM Hursley Laboratories on modelling of the CICS transaction processing system, one of the most significant software systems ever. As part of the UK government's cybersecurity strategy, he used Z techniques to develop secure office automation systems and a secure version of UNIX. He worked with the Smith Institute and BR Research to verify the safety of railway signalling systems, approaches developed further in safety critical control systems for the UK Nuclear Installation Inspectorate and British Energy. He provided a technically complete theory of correctness for Z verifying

its soundness from first principles and completed the verification of Mondex a smartcard based electronic cash system the first application of a general theory of program correctness to an industrial product He coordinated the experimental work of the Verified Software Initiative an international grand challenge More recently he extended the collection of standard Unifying Theories of Programming UTP with work on object orientation and hybrid systems Currently he is working on a UTP theory of probabilistic programs with application to robotics Jim has been a lecturer research fellow reader and professor at the University of Surrey the University of Oxford the University of Kent and since 2004 the University of York and he is a visiting professor at the Federal University of Pernambuco and Trinity College Dublin He is a Fellow of the Royal Academy of Engineering the British Computer Society and the Formal Methods Europe association and he was part of the team that won the Queen s Award for Technological Achievement in 1992 He is the Editor in Chief of the ACM journal Formal Aspects of Computing he has chaired major related academic conferences and he has contributed to CCITT and Z ISO international standards Throughout all these activities Jim has been a guide and inspiration to colleagues and students and collaborated successfully with researchers in the UK Brazil China France USA Ireland and Singapore Many of these researchers show in their contributions to this volume the ongoing impact of his work
