The Caste of Merit Ajantha Subramanian, 2019-12-03 How the language of merit makes caste privilege invisible in contemporary India Just as Americans least disadvantaged by racism are most likely to endorse their country as post racial Indians who have benefited from their upper caste affiliation rush to declare their country post caste In *The Caste of Merit* Ajantha Subramanian challenges this comfortable assumption by illuminating the controversial relationships among technical education caste formation and economic stratification in modern India Through in depth study of the elite Indian Institutes of Technology IITs widely seen as symbols of national promise she reveals the continued workings of upper caste privilege within the most modern institutions Caste has not disappeared in India but instead acquired a disturbing invisibility at least when it comes to the privileged Only the lower castes invoke their affiliation in the political arena to claim resources from the state The upper castes discard such claims as backward embarrassing and unfair to those who have earned their position through hard work and talent Focusing on a long history of debates surrounding access to engineering education Subramanian argues that such defenses of merit are themselves expressions of caste privilege The case of the IITs shows how this ideal of meritocracy serves the reproduction of inequality ensuring that social stratification remains endemic to contemporary democracies
