Sharp decreases in union membership over the last fifty years have caused many to dismiss organized labor as irrelevant in today s labor market In the private sector only 8 percent of workers today are union members down from 24 percent as recently as 1973 Yet developments in Southern California including the successful Justice for Janitors campaign suggest that reports of organized labor s demise may have been exaggerated In L A Story sociologist and labor expert Ruth Milkman explains how Los Angeles once known as a company town hostile to labor became a hotbed for unionism and how immigrant service workers emerged as the unlikely leaders in the battle for workers rights L A Story shatters many of the myths of modern labor with a close look at workers in four industries in Los Angeles building maintenance trucking construction and garment production Though many blame deunionization and deteriorating working conditions on immigrants Milkman shows that this conventional wisdom is wrong Her analysis reveals that worsening work environments preceded the influx of foreign born workers who filled the positions only after native born workers fled these suddenly undesirable jobs Ironically L A Story shows that immigrant workers who many union leaders feared were incapable of being organized because of language constraints and fear of deportation instead proved highly responsive to organizing efforts As Milkman demonstrates these mostly Latino workers came to their service jobs in the United States with a more group oriented mentality than the American workers they replaced Some also drew on experience
