Non-Binding Norms in International Humanitarian Law Emily Crawford, 2021-12-23 This monograph examines and analyses the phenomenon of non binding instruments also known as soft law in the law of armed conflict or international humanitarian law In the past 30 years there have been several non binding instruments created designed as either best practice guidelines or re statements of applicable law These instruments are not treaties but they nevertheless put themselves forward as authoritative statements of what the law is and in some instances what the law should be Soft law instruments can be dynamic prompt and responsive measures to address pressing issues in armed conflicts By drawing on the skill of a small group of experts these instruments can be debated and drafted in a timelier manner than if these issues were to be left to the international community of 194 States to resolve Furthermore because these instruments do not have to be sent for debate to an international conference of States it means that the provisions are

not subject to the usual revisions reservations and dilutions that come with attempting to reach consensus However there are potential and actual problems with these instruments and the processes that bring them to fruition and how they are received in practice by States and other stakeholders This volume looks at the benefits and drawbacks for States and non State actors with regards to soft law whether they are effective additions to the law of armed conflict analysing the development through the lens of theories of legitimacy and legality in international law Weapons and the Law of Armed Conflict William H. Boothby, 2016-03-10 Bringing together the law of armed conflict governing the use of weapons into a single volume the fully updated Second Edition of Weapons and the Law of Armed Conflict interprets these rules and discusses the factors influencing future developments in weapons law After relating the historical evolution of weapons law the book discusses the important customary principles that are the foundation of the subject and provides a condensed account of the law that exists on the use of weapons The treaties and customary rules applying to particular categories of weapon are thereafter listed and explained article by article and rule by rule in a series of chapters Having stated the law as it is the book then explores the way in which this dynamic field of international law develops in the light of various influences The legal review of weapons is discussed both from the perspective of how such reviews should be undertaken and how such a system should be established Having stated the law as it is the book then investigates the way in which this dynamic field of international law develops in the light of various influences In the final chapter the prospects for future rule change are considered This Second Edition includes a discussion of new treaty law on expanding bullets the arms trade and norms in relation to biological and chemical weapons It also analyses the International Manuals on air and missile warfare law and on cyber warfare law the challenges posed by lethal autonomous weapon systems and developments in the field of information and telecommunications otherwise known as cyber activities *Learning the Language of Addiction Counseling* Geri Miller, 2020-12-09 Fully revised Learning the Language of Addiction Counseling Fourth Edition introduces students and mental health professionals to the field of addiction counseling and helps them develop the knowledge understanding and skills needed to counsel people who are caught in the destructive cycle of addiction Drawing from her years of experience working in the addiction counseling field Geri Miller provides an engaging balanced overview of the major theoretical underpinnings and clinical practices in the field From assessment and diagnosis of addiction to preparing for certification and licensure as an addiction professional this comprehensive book covers all of the essentials **Advances in Forensic Human Identification** Xanthe Mallett, Teri Blythe, Rachel Berry, 2014-01-24 As forensic human identification receives increased global attention practitioners policy makers and students need an appropriate resource that describes current methods and modalities that have shaped today's policies and protocols A supplemental follow up to Forensic Human Identification An Introduction Advances in Forensic Human Identification covers advances in the most well known scientific techniques and discusses new and developing subjects and modalities of human identification A collection of contributions

from worldwide experts the book embraces a broad context and looks at several issues beyond physical identification of human remains or offenders The book examines online sexual and biometric identities and discusses problems associated with investigative practice such as the developing use of the Internet as a distribution and communication medium for criminal activities It also explores miscarriages of justice that can result from flawed applications or interpretations of forensic evidence Finally it looks at the future of forensic science in the United Kingdom in light of financial challenges and the closure of the Forensic Science Service Where appropriate case studies illustrate the use of techniques and the associated problems described in the text The downloadable resources include images in full color This volume provides an important contribution to the ongoing practitioner and academic debates surrounding the application of forensic technologies The insight presented is destined to springboard further inquiry into enhanced techniques and underlies the need for more research into the appropriate use of identification techniques to solve the mysteries of the unknown **The**

Legality and Accountability of Autonomous Weapon Systems Afonso Seixas-Nunes,2022-05-19 By adopting a multi disciplinary approach this book provides a comprehensive analysis of the legality of the use of autonomous weapons systems under international law It examines different arguments presented by States roboticists and scholars to demonstrate the challenges such systems will create for the laws of war This study examines how technology of warfare seeks to increase the dissociation of risk and communication between weapons and their human operators Furthermore it explains how algorithms might give rise to errors on the battlefield that cannot be directly attributed to human operators Against this backdrop Dr Seixas Nunes examines three distinct legal frameworks the distinction between the legality of weapons and the laws of targeting different mechanisms of individual accountability and the importance of recovering the category of *dolus eventualis* for programmers and technicians and finally State responsibility for violations of the laws of war caused by weapons software errors *Responsible Use of AI in Military Systems* Jan Maarten Schraagen,2024-04-26 Artificial Intelligence AI is widely

used in society today The mis use of biased data sets in machine learning applications is well known resulting in discrimination and exclusion of citizens Another example is the use of non transparent algorithms that can't explain themselves to users resulting in the AI not being trusted and therefore not being used when it might be beneficial to use it *Responsible Use of AI in Military Systems* lays out what is required to develop and use AI in military systems in a responsible manner Current developments in the emerging field of Responsible AI as applied to military systems in general not merely weapons systems are discussed The book takes a broad and transdisciplinary scope by including contributions from the fields of philosophy law human factors AI systems engineering and policy development Divided into five sections Section I covers various practical models and approaches to implementing military AI responsibly Section II focuses on liability and accountability of individuals and states Section III deals with human control in human AI military teams Section IV addresses policy aspects such as multilateral security negotiations and Section V focuses on autonomy and meaningful human control in

weapons systems Key Features Takes a broad transdisciplinary approach to responsible AI Examines military systems in the broad sense of the word Focuses on the practical development and use of responsible AI Presents a coherent set of chapters as all authors spent two days discussing each other's work This book provides the reader with a broad overview of all relevant aspects involved with the responsible development deployment and use of AI in military systems It stresses both the advantages of AI as well as the potential downsides of including AI in military systems *International Humanitarian Law* Marco Sassòli, 2024-02-12 In this thoroughly updated second edition of what has quickly become the definitive text in the field of international humanitarian law IHL leading expert Marco Sassòli evaluates the application of IHL the way in which hostilities should be conducted against an adversary and the pertinence of traditional distinctions such as that between international and non international armed conflicts **Military Weapons and Environment** Wing Commander (Dr) Umesh Chandra Jha, 2017-10-15 Armed conflicts have become more complicated with the emphasis shifting towards new weapons such as drones cybercrime and autonomous weapons In July 2017 the UN General Assembly adopted the Treaty on the Prohibition of Nuclear Weapons This treaty prohibits a full range of nuclear weapon related activities such as undertaking to develop test produce manufacture acquire possess or stockpile nuclear weapons or other nuclear explosive devices as well as the use or threat of use of these weapons The ongoing conflicts have shown that the consequences of the use of explosive weapons are not limited to death physical injury and disability but also include long term impacts on mental well being The use of improvised weapons by States and non State actors is an area of concern for the environment Every State must therefore ensure that weapons used by their armed forces are explicitly adjudged under International Humanitarian Law IHL and Human Rights Law While reviewing a new weapon the States must adopt multilateral approaches drawing upon relevant legal health environmental and military expertise This book describes the environmental effects of eight weapons and explosive remnants of war that have caused extensive environmental harm in the recent past It also makes specific recommendations addressed to the international community and the States for protecting the natural environment from the impact of weapons of war This book will contribute towards a better understanding of the environmental harm caused by military weapons *Forensic Science* Douglas H.
