## Lab 56

### Background

Birds have many adaptations for flight. Hollow bones make birds light. Their leather-covered bodies are streamlined, which reduces air resistance. Strong flight muscles move the wings, and the wings provide aerodynamic lift.

Birds are also adapted to their food source and to their environment. Their beaks and tongues are shaped in ways that help in getting food. Their feet are modified to function in a particular environment.

The various sizes and shapes of beaks and tongues are adaptations for capturing, holding, and eating particular kinds of food. Tongues vary in length and shape. Some beaks are hooked or toothed for grasping and tearing; some are pointed for spearing food; some are long and thin, for probing flowers.

The legs and feet of birds are adapted for running, swimming, climbing, perching, seizing prey, and other activities. Toes on the feet may be long and slender, or short and stout. Many birds have a long toe that points backward. At the end of each toe is a nail, made of strong, hornlike material. Nails may be blunt or sharp. They may be long or short. The nails of birds of prey, such as hawks and owls, are called talons. These nails are very long, hooked, thick, and sharp.

### Objectives

1. Observe adaptations of beaks of birds, and relate these to each bird's method of feeding.
2. Observe adaptations of legs and feet of birds, and relate these to each bird's environment.

### Procedures and Observations

1. Examine the size and shape of the beak of each bird shown in Figure 1. Decide if each beak is long or short. A beak is *long* if it is the same size or longer than the bird's head. It is *short* if it is shorter than the bird's head.
  - a. Record these observations in Table 1 on page 346.
2. You can determine the function of a bird's beak by examining its structure. The structure and function of various beaks are described in Table 2. Match these descriptions to the birds shown in Figure 1.
  - b. In Table 1, record the structure and function of each bird's beak.
