Hazardous Materials: Managing the Incident Field Operations Guide Armando (Toby) Bevelacqua, 2013-07
Strategic and tactical decision making is easy with the Hazardous Materials Managing the Incident Field Operations Guide. In order to minimize the risks associated with hazardous materials emergencies, responders need clear and defined response guidelines that help to define their roles within the response plan. The Eight Step Process for managing hazardous materials incidents has been used by thousands upon thousands of responders to safely and systematically deal with HazMat emergencies. The Hazardous Materials Managing the Incident Field Operations Guide (FOG) will help you incorporate the Eight Step Process to standardize procedures, bring consistency to the tactical operation, and as a result, minimize risks at the incident scene. The FOG includes Detailed tactical checklists that follow the Eight Step Process, A section on identification and recognition of containers, Data cards on the top 50 hazardous materials and chemical, biological, radiological, nuclear, and explosives (CBRNE) Weapons of Mass Destruction (WMD) matrix, and drug lab precursor chemicals. Phoenix Haz Mat Response Jeffrey Zientek, 2014-02-01. This guide serves as a quick reference for Hazardous Materials Teams in the field. It discusses teams involved, how to organize them, and the first steps that lay the foundation for an effective hazardous incident response. *Field Operations Guide (FOG) for Metropolitan Medical Strike Team (MMST)*. , 1998 Field Operations Guide for Disaster Assessment and Response , 1994 Field Operations Guide for Disaster Assessment and Response U.S. Agency for International Development, 2013-07-01.
