Neurological Disorders Rameshwar Nath Chaurasia,Sunny Ohia,Debasis Bagchi,2024-06-05 According to World Health

Organization WHO one billion people worldwide are affected by one of the thousands of neurological disorders including epilepsy Alzheimer disease strokes and headaches Neurological disorders also include brain injuries neuroinfections multiple sclerosis and Parkinson disease A Review on Neurological Disorders Pathophysiology Molecular Mechanisms and Therapeutics covers the major topics related to neurological disorders current challenges in diagnosis and intervention This book is organized into four distinct sections starting with an introduction providing a general overview of the epidemiology of neurological disorders pathogenesis and management The second section presents the aspects of brain diseases due to infection of bacteria parasite fungus and viruses The third section discusses neurodegenerative disorders due to comorbid factors like diabetes hypertension hyperlipidemia and post traumatic brain injuries The last section covers prevention through application of bioactive compounds and neuroprotective agents Epidemiology of neurological disorders and pathogenesis Explores neuroinflammation ligand receptors binding and neurodegeneration Discusses aging and associated disorders in the onset of neurological disorders Neuropharmacology and the protective role of bioactive compounds in neuroprotection **Natural Products and Neuroprotection** Cristina Angeloni, David Vauzour, 2020-06-17

Neurodegenerative diseases including Alzheimer s Parkinson s Huntington s and amyotrophic lateral sclerosis are the most common pathologies of the central nervous system currently without a cure They share common molecular and cellular characteristics including protein misfolding mitochondrial dysfunction glutamate toxicity dysregulation of calcium homeostasis oxidative stress inflammation and ageing which contribute to neuronal death Efforts to treat these diseases are often limited by their multifactorial etiology Natural products thanks to their multitarget activities are considered promising alternatives for the treatment of neurodegeneration This book deals with two different forms of natural products extracts and isolated compounds The study of the bioactivity of the extracts is extremely important as many studies have demonstrated the synergistic effect of the combination of different natural products On the other hand the investigation of the activity of specifically isolated natural products can be also important to understand their cellular and molecular mechanisms and to define the specific bioactive components in extracts or foods This book can be considered an important contribution to knowledge of the neuroprotective effect of natural products and presents a great deal of information related to both the benefits but also the limitations of their use in counteracting neurodegeneration Vitamins and Hormones ,2001-04-30

Vitamins and Hormones is the longest running serial published by Academic Press The Editorial Board reflects expertise in the fields of hormone action vitamin action X ray crystal structure physiology and enzyme mechanisms Every volume contains comprehensive reviews by leading contributors Extraction Processes in the Food Industry Seid Mahdi Jafari, Sahar Akhavan-Mahdavi, 2023-10-19 Extraction Processes in the Food Industry a volume in the Unit Operations and Processing Equipment in the Food Industry series explains the processing operations and equipment necessary for extraction of different food ingredients and nutraceuticals including conventional and modern extraction techniques These processes and unit

operations are very important in the manufacture of products such as edible oils sugars coffee tea essential oils and other products Divided in three sections Different extraction equipment and technologies Application of extraction in the food industry and Design control and efficiency of extraction systems all chapters emphasize basic texts relating to experimental theoretical computational and or applications of food engineering principles and the relevant processing equipment for extraction unit operations Written by food engineering experts Extraction Processes in the Food Industry is a useful resource for industrial engineers working in the field of food processing and within food factories providing information on particular food processing operations and equipment Thoroughly explores novel applications of extraction unit operations in food industries Helps readers improve the quality and safety of food ingredients using optimum extraction processes Brings different alternatives for extraction operations *Food Preservation and Safety of Natural Products* Helen N.

Onyeaka,Ozioma F. Nwabor,2022-06-15 Food Preservation and Safety of Natural Products addresses the most common causes of food spoilage that create significant loss to global food production while also discussing how food serves as a vehicle for the transmission of pathogenic microorganisms responsible for mild to debilitating health conditions in humans The book provides essential information for food safety professionals on issues relating to foodborne diseases and offers potential solutions by presenting various methods of incorporating natural products in food production to prevent the spread of foodborne pathogenic organisms The demand for green consumerism and consumers general distaste for synthetic food additives poses a serious challenge to food safety and preservation Natural products are used as green and sustainable source of bioactive compounds that can be applied in various fields including food The use of plant and other natural products in food preservation is on the rise hence this book reviews microbial mediated food spoilage foodborne pathogens and food contamination and offers applications of natural products in food preservation Provides important information on microbial metabolic by products natural enzymatic processes to prevent food spoilage or deterioration Includes molecular techniques for antimicrobial and antioxidant applications in food food packaging and edible films Presents the latest evidence based science on the natural products used as additives in food **Green Tea Healing** Samuel Livingston,AI,2025-03-13

Green Tea Healing explores the science backed benefits of green tea for enhancing overall health and well being It delves into how this beverage can promote heart health boost brain function and aid detoxification emphasizing its role as a natural remedy A key focus is on antioxidants particularly EGCG which combat oxidative stress a major contributor to aging and various diseases The book highlights green tea s historical significance as a health tonic and connects ancient wisdom to modern scientific research making complex information accessible The book progresses by first explaining the basics of antioxidants and oxidative stress then examines how green tea impacts cardiovascular health cognitive function and detoxification processes For instance research suggests green tea can help lower cholesterol levels and improve blood vessel function It also explores how green tea may enhance memory and protect against neurodegenerative diseases The book

culminates with practical guidance on incorporating green tea into daily life including tips on tea selection and brewing methods making it a valuable resource for those seeking natural ways to improve their health **Proceedings of the 3rd International Conference on Food Factors** S.
