lives and leisure the growth of structured and organised activities and increasing perceptions of risk in children's play Play Physical Activity and Public Health presents a discussion of the way modern notions of play are rendering children's leisure activities less free and less engaged in simply for fun Based on original qualitative research and analysis of contemporary media from Canada and elsewhere this book argues that the growing health concerns around childhood play entail a paradox by advocating promoting discussing and re directing children's play a new form of children's leisure is emerging one that is purpose driven instrumentalised for health and ultimately less free We explore how play has become goal oriented a means to health ends and how the management of pleasure in play as well as diverse risk discourses around play continue to limit and constrain possibilities for children and families to play and engage in leisure freely Incorporating past critiques of this trend in play we argue for research and practice to create new possibilities and ways of thinking about children's play leisure fun and childhood that are less constrained and managed and importantly less geared towards health goals This is a valuable resource for students of the sociology of sport kinesiology sports and health psychology education public health and childhood studies It is also an important read for school teachers public health practitioners psychologists physical education teachers academics and parents interested in how children's leisure lives are being shaped by the growing and diverse discussions around play
