Self care is about people's attitudes and lifestyle as well as what they can do to take care of themselves when they have a health problem. Supporting self care is about increasing people's confidence and self esteem enabling them to take decisions about the sensible care of their health and avoiding triggering health problems. Although many people are already practising self care to some extent there is a great deal more that they can do. Ruth Chambers, Gill Wakley and Alison Blenkinsopp in the Preface. Designed around the Department of Health's Working in Partnership Programme this book is full of easy to implement advice for everyday use promoting a positive approach to self care and demonstrating how smoothly it can be introduced and undertaken. Supporting Self Care in Primary Care encourages interactive professional learning and development both individually and within a team and highlights the importance and benefits of self care in the workplace. It is a self contained text with tools and illustrative examples to aid comprehension and includes a complementary web resource containing further tools and a training package. All healthcare professionals involved in commissioning or providing primary care to patients will find this practical guide invaluable as will healthcare managers and health promotion specialists.

Whitaker's Book List ,1991 *Tank Gun Systems* William Andrews, 2023-06-30. Much has been written about the use of tanks in battle. Little however has appeared about the gunnery systems that are at their core. This book describes and examines the main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of World War II in 1945 including tanks of the interwar period. Specifically considered are guns of a caliber greater than 35 mm which have been deployed in numbers greater than 100. The emphasis is on guns mounted in turrets on heavier tracked armored fighting vehicles greater than 15 tonnes which were considered tanks. There are though exceptions in that the naval 6 pounder guns in First World War British tanks as well as the 75 mm guns in French medium tanks of the same period all turretless are included. The treatment of gun systems includes sighting and fire control equipment, gun laying equipment, mounts and the array of munitions fired as well as the actual gun including its barrel, cradle, breech, firing mechanism, sights and recoil system. Related to this are issues of gun handling, loading and unloading, ammunition design and rates of fire. Also examined are the maximum impulse and energy generated by firing some of the munitions available that must be absorbed by the gun recoil system. **The Bookseller** ,1981 **Road and Track** ,1985 **Road & Track**
