There are powerful yet rarely known visualization techniques that employ mental tools as effective means of relieving pain healing injuries and more importantly to rewire the brain to channel energies towards one's goals. While there are any number of books on self or energy healing and visualization there are none written in modern times that discuss the active and purposeful application of mental tools the practice of which is immensely more effective than the commonly known techniques of passive visualization guided imagery and meditation. This practice may have its roots in the 3000 year old Indian tradition called Tantra but since forgotten for practical purposes and in any case never well explained. The author unlocks these secrets in this book that marks a new territory in our understanding of the potential of mind body dynamics. Healing is the first step towards awakening Chi it is not the other way round. Chi Reiki Prana and even mindfulness all harness the internal life force. Medical practitioners may call it body's natural defenses or immunity mechanisms. However for injured bodies and mind Chi or Prana is suppressed and it is very difficult to summon it for healing. One needs to take a painstaking approach of using mental tools and techniques to elevate Chi first and make it habitually available so that healing can take effect. Body is the temple of mind. Even minor injuries keep nagging and can hinder performance and prevent one from reaching full potential. Healing yourself and bringing your body and mind to a top rejuvenated state is the key first step towards awakening your inner Chi gaining vitality and success in life. That's the precise reason that the tools and techniques discussed in this book based on Tantric secrets are immensely potent and unlike any other energy healing system commonly touted. Unlike traditional meditative and guided imagery techniques the practitioner of Tantric techniques is not merely focused on positive affirmations or end result. She actively seeks to feel or pinpoint the perceived source of the problem or pain location and uses a progressively evolving visualization technique of using invasive tools to surgically rectify the perceived source of the problem. Make no mistake this is super powerful. It jolts you and your inner systems out of lazy and passive hoping and makes you an active surgeon who is knowingly performing the actions of repair and recovery. These techniques leverage the ultimate potential of human beings mind body dynamics and as a note without association to religious belief systems or mystical thinking. This book unravels how one can quickly reach a deep trance like state that is supremely beneficial to healing and for rewiring the body muscle memory and mind. This book is intended as a practical guide and demonstrates the theory's applications via the case studies in Chapter 4. The case studies not only discuss the solution design process for healing but also demonstrate the versatility of the techniques and the range of the possible solutions. The detailed analysis with some case studies must be considered an extension of the theory provided in Chapters 1 and 2. The case studies covered in the book include the following conditions: Sore throat Common cold Headache Stomach pain Tennis elbow Knee pain Back pain Neck pain Costochondritis Diabetes Bone injury. Chapter 5 and the case studies therein provide insight into how to use the techniques of this book to enhance mental performance to channel energies towards financial planning overcome personality limitations and achieve life's goals.
