

Manual Handling Regulations

What You Need to Know...

The fundamental aim of the Manual Handling Regulations poster is to prevent injury to the body. Manual handling refers to any transportation or support of a load by hand or bodily force.

Take account of the situation

- If possible always use a mechanical aid or lift to move heavy loads. Where this is not a possibility carefully plan how you will manually handle the load.

REMEMBER
Plan your route, check for hazards, take a rest and always wear the correct Personal Protective Equipment.

Important points to remember

- You must check for any potential hazards for example, sharp edges, hooks or staples protruding from the parcel.
- Is the parcel stable and light enough to lift. Know your lifting limits.
- Plan your route - ensure there are no potential trip or slip hazards. Ensure the destination is clear to deposit the parcel.
- If you need to stop and rest - do so in a clear, safe area.
- Relevant PPE* should be provided by your employer and must be worn during all manual handling tasks.

1. Plan your lift before you do it.

2. Feet should be spread close to the load, knees bent and keep the back straight.

3. Grip the load and keep your arms close to your body, use the legs and upper body to lift the load.

4. Keep the load close to your body and keep the load as straight as possible.
