Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1975 From Heaven to Earth Teófilo F. Ruiz, 2016-07-26 Between the late twelfth century and the mid fourteenth Castile saw a reordering of mental spiritual and physical space Fresh ideas about sin and intercession coincided with new ways of representing the self and emerging perceptions of property as tangible This radical shift in values or mentalities was most evident among certain social groups including mercantile elites affluent farmers lower nobility clerics and literary figures middling sorts whose outlooks and values were fast becoming normative Drawing on such primary documents as wills legal codes land transactions litigation records chronicles and literary works Teófilo Ruiz documents the transformation in how medieval Castilians thought about property and family at a time when economic innovations and an emerging mercantile sensibility were eroding

the traditional relation between the two He also identifies changes in how Castilians conceived of and acted on salvation and in the ways they related to their local communities and an emerging nation state Ruiz interprets this reordering of mental and physical landscapes as part of what Le Goff has described as a transition from heaven to earth from spiritual and religious beliefs to the quasi secular pursuits of merchants and scholars Examining how specific groups of Castilians began to itemize the physical world Ruiz sketches their new ideas about salvation property and themselves and places this transformation within the broader history of cultural and social change in the West **Research in Education** ,1971

Safety is Seguridad National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on Earth Resources, Committee on Communicating Occupational Safety and Health Information to Spanish-speaking

Workers, 2003-04-03 Approximately 32.8 million persons of Hispanic descent live in the United States, half of whom were born outside the United States (Therrien and Ramirez 2000). By the year 2050, it is expected that Hispanics will constitute more than 25 percent of the total U.S. population and approximately 15 percent of the U.S. labor force. These estimates, and the fact that 90 percent of Hispanic American men and 60 percent of Hispanic American women participate in the U.S. workforce, strongly suggest a need for occupational safety and health information in Spanish. The growing presence of Spanish-speaking workers and employers in the United States and the unprecedented 12 percent increase in the overall rate of workplace fatalities among Hispanic workers in 2000 highlights the need to better communicate occupational safety and health information in Spanish to both employees and employers. To address this need, the National Institute for Occupational Safety and Health (NIOSH) is preparing a strategy for developing and disseminating Spanish language occupational safety and health educational and technical material. To gather information necessary to create this strategic plan, the National Research Council (NRC) was asked to host a workshop. The committee commissioned five white papers (see Appendices D, H, and I) and organized a workshop on May 29-30 in San Diego, California. *Safety is Seguridad: A Workshop Summary* is a synopsis of the presentations and discussions at the workshop. It does not contain any conclusions and recommendations. The conclusions and recommendations in the white papers represent the views of the authors and not necessarily those of the committee or the NRC. It is intended as input to the NIOSH strategic planning in this area. Chapter 2 discusses the available information and identifies information gaps regarding risks and adverse events for Latino workers. Chapter 3 examines the available health and safety training resource materials for Latino workers, especially for those with little or no English capabilities; in particular, it discusses issues of the linguistic and cultural appropriateness of materials. Chapter 4 considers issues surrounding the assessment of existing materials and the development of new materials. Chapter 5 discusses the various means of conveying information to Spanish-speaking workers, again focusing on cultural appropriateness and ways of maximizing understanding. Chapter 6 summarizes the discussion in the prior chapters and presents some overarching issues raised by the workshop attendees.
