**High-Resolution Remote Sensing** Guoqing Zhou, 2020-12-21 With urbanization as a global phenomenon, there is a need for data and information about these terrains. Urban remote sensing techniques provide critical physical input and intelligence for preparing base maps, formulating planning proposals, and monitoring implementations. Likewise, these methodologies help with understanding the biophysical properties, patterns, and process of urban landscapes, as well as mapping and monitoring urban land cover and spatial extent. Advanced sensor technologies and image processing methodologies, such as deep learning, data mining, etc., facilitate the wide applications of remote sensing technology in urban areas. This book presents advanced image processing methods and algorithms focused on three very important roots of urban remote sensing: 3D urban modelling using different remotely sensed data, urban orthophotomap generation, and urban feature extraction, which are also today's real challenges in high-resolution remote sensing. Data generated by remote sensing with its repetitive and synoptic viewing and multispectral capabilities constitutes a powerful tool for mapping and monitoring emerging changes in the city's urban core, as well as in peripheral areas. Features: Provides advances in emerging methods and algorithms in image processing and technology. Uses algorithms and methodologies for handling high-resolution imagery from a ground sampling

distance GSD less than 1 0 meter Focuses on 3D urban modelling orthorectification methodologies and urban feature extraction algorithms from high resolution remotely sensed imagery Demonstrates how to apply up to date techniques to the problems identified and how to analyze research results Presents methods and algorithms for monitoring analyzing and modeling urban growth urban planning and socio economic developments In this book readers are provided with valuable research studies and applications oriented chapters in areas such as urban trees soil moisture mapping city transportation urban remote sensing big data etc
