Consulting for Business Sustainability Chris Galea, 2017-09-08 The fast emerging sustainability consulting firms are nipping at the heels of the established consultancy giants who are scrambling to find their way in the emergent field of sustainability. The upstarts are challenging many of the established notions of how to add value to their clients' operations. By looking at the business world through what the sustainability expert Stuart Hart calls new sustainability lenses, sustainability consultants are able to make sense of challenges that are baffling their clients. Moreover, they are also beginning to help their clients uncover new and sustainable value streams, the ultimate goal of good consulting practice. In *Consulting for Business Sustainability*, sustainability consultants from around the world offer some of their perspectives and lessons on how to truly create sustainable value for their clients. Packed with new tools, advice, and approaches, the book comprises a unique collection of wisdom from some of the leading lights in sustainability consulting practice. The areas covered include developing best in class environmental management systems, sustainable design, supporting organisational change, agents working with key stakeholders, social impact assessments, human rights, and regulatory risk. The book will be essential reading for practitioners in business searching for advice and toolkits on how to make their sustainability initiatives bear fruit, for consultants looking for advice on how others have provided value to clients, and for students of sustainability looking for best practice examples and exploring future careers in this burgeoning field.

A Technical Manual for Parasitic Weed Research and Extension J. Kroschel, 2013-12-01 Parasitic weeds of the families Cuscutaceae, Orobanchaceae, and Scrophulariaceae are considered to be among the major problems facing agriculture in the Tropics and Subtropics. In the last decades, enormous efforts have been made and success achieved by scientists all over the world in gaining a better understanding of their biology and ecology as well as of control methods. However, no substantial reduction of infestation has been achieved in the past, and control strategies specific to the different parasites, crops, and farming systems must be further developed or adapted and realised among a wider farming population with suitable extension methods. This Technical Manual provides up-to-date methodologies for various aspects of research and extension related to parasitic weed species of the genera *Striga*, *Alectra*, *Orobanche*, and *Cuscuta*. It has the intention to support scientists and extension workers of international and national research and extension institutes and universities who are either new to the subject or plan to apply further techniques they are not yet familiar with.

Private food law Bernd van der Meulen,2023-09-04 Since the turn of the Millennium world wide initiatives from the private sector have turned the regulatory environment for food businesses upside down For the first time in legal literature this book analyses private law initiatives relating to the food chain often referred to as private voluntary standards or schemes Private standards are used to remedy flaws in legislation in order to reach higher levels of consumer protection than the ones chosen by the EU legislature and to manage risks and liability beyond the traditional limits of food businesses We see that litigation is no longer solely framed by legislative requirements but ever more by private standards such as GlobalGAP BRC IFS SQF and ISO These private standards incorporate public law requirements thus embedding them in contractual relations and exporting them beyond the jurisdiction of public legislators Other standards focus on corporate social responsibility or sustainability This book also addresses how private religious standards such as Kosher and Halal play a role in defining specific markets of growing importance It is noted that organic standards have found an interesting symbioses with public law Another development on this topic is that food businesses are inspected more often by private auditors than by public inspectors Effects in terms of receiving or being denied certification far outweigh public law sanctions In short private law has changed an entire legal infrastructure for the food sector It emerges as competing with the public law regulatory infrastructure This book is of interest to all who concern themselves with food law legislation and litigation and the evolving role of private standards on changing the landscape of food chains
