San Francisco cataloguing for public libraries, a manual of the system used in the San Francisco free public library Frederic Beecher Perkins, 1884 **Manual** Library Services Center of Missouri (Jefferson City), 1960 *Personal Identification* David J. Haas, 2024-03-04

Personal Identification Modern Development and Security Implications Second Edition explains how personal identification and REAL ID became part of the American fabric along with their past century's historical ID development. The development of the trusted and secure personal identification documents began with passports and has continued as social changes made IDs more essential. This book describes the convergence of technologies and hundreds of patents that produced our trusted and secure documents and IDs from our past right up through to today. Key factors that created today's need for public issued mass ID are addressed. Chronicles the effects of large and mobile populations beginning a century ago. Chronicles the effects of impersonal electronic computer communications at a distance and not face to face. The distribution of services and money by government agencies based on a person's identity including age and group criteria. Describes recent national security and terrorism concerns that necessitates the need to know. You are who you say you are. Personal identification documents, IDs, and the societal need for trusted identification by the public is a relatively new social phenomenon. In 1900 most people did not need or have any IDs until passports with a photograph of the individual became mandatory when Great Britain entered World War I in 1914. In the United States the State issued driver's license is probably the only trusted ID in one's wallet today but they became trusted and secure documents only recently with the requirement for REAL ID. With the first photo driver's license issued by the State of Colorado in 1959 it took until 1984 for the last State New York 25 years later to comply. As a direct result of 9/11 where terrorists used fake driver's licenses to board planes Congress passed the Real ID Act in 2005 to make all State issued driver's licenses more trusted, uniform, and tamper resistant, what is now called the Enhanced Driver's License, with non-drivers being issued Enhanced Identification Cards. And with this every US citizen can now possess a trusted and secure personal identification document.

Personal Identification Second Edition chronicles the path of personal identification measures including the latest developments of Real ID. Scholars and professional security managers understand that stability, security, and safety necessitate these identity measures to ensure a safer America. The book explains the various stages and advances providing readers with a unique study of this fascinating history of the relationship between identity and the means by which one validates and proves their own identity. The enactment of the REAL ID Act of 2005 with more secure and tamper resistant documents for each citizen of the United States is being instituted so that one can trust you are who you say you are. The State issued driver's license is not a National ID Card; it is a Nationally Recognized ID for each citizen.
