*Warriors and Worriers* Joyce F. Benenson, 2014-02 In *Warriors and Worriers* psychologist Joyce Benenson presents a new theory of sex differences based on thirty years of research with young children and primates around the world In this exciting exploration of human nature Benenson thus turns upside down the familiar wisdom that women are more sociable than men and that men are more competitive than women

**A Mind So Rare** Merlin Donald, 2002 Donald psychology Queen s University Canada challenges the prevailing view that seeks to explain away human consciousness and presents a theory on the origins of the modern mind He describes the cultural and neuronal forces that power human modes of awareness and proposes that the human mind is a hybrid product of the interweaving of the brain with an invisible symbolic web of culture to form a distributed cognitive network Using evidence from brain and behavioral studies of humans and animals he explains how an expansion of consciousness transcends the limitations of the mammalian mind and elaborates the foundations of self evaluation and self reflection c Book News Inc

*Human Nature and Biocultural Evolution* Joseph Lopreato, 2024-12-02 First published in 1984 *Human Nature and Biocultural Evolution* aims to delineate a theory of human nature viewed as an interrelated set of genetically programmed behavioral predispositions and a theory of biocultural evolution The author s approach is based on the hypothesis that innate predispositions and cultural environmental factors cooperate to determine human behavior and socio cultural forms Professor Lopreato begins by tracing the development of evolutionary biology up to sociobiology It is his argument that the social and biological disciplines have for over a century been moving towards a synthesis and that *Homo sapiens* is neither just another animal nor so unique a being that culture has become divorced from its genetic underpinnings The argument is supported with evidence from evolutionary biology and social science with a critical discussion of basic issues of behavioral science and with an analysis of certain famous theories in social science e g theories of suicide anomie capitalism which prove to be richer and more complete when viewed from a biocultural perspective The theory of human nature is arrived at through a rich analysis of ethnographic psychological and sociological arguments and data as well as facts and theories from comparative zoology In the process the author treats

critically numerous theoretical problems associated with topics such as exploitation class consciousness structured inequality reciprocal behavior territorial aggression religious ritual socialization ethnicity and prejudice The author concludes with an examination of behavioral predispositions that are hypothesized to be at the base of cultural variation
