Typology of Farm Households and Irrigation Systems Hiroyuki Takeshima, Hyacinth Edeh, 2013-04-25 Irrigation is considered an important factor for agriculture and food security Knowledge gaps however still exist with regard to how farmers in Africa south of Sahara including Nigeria are using irrigation Given the diverse agroecological and socioeconomic environment in countries like Nigeria understanding the diverse patterns of irrigation use and their associations with household characteristics is important in designing how irrigation can contribute to the agricultural transformation This report summarizes the typology of farm households and irrigators in Nigeria We apply a cluster analysis method to the Living

Standard Measurement Survey LSMS Integrated Survey on Agriculture data and various secondary data We also compare the costs and inputs used across different irrigation crops as reported in Nigeria Findings indicate that the three major irrigation systems in Nigeria are 1 labor intensive diverted stream irrigation of rice 2 supplementary irrigation of coarse grains and legumes using groundwater and 3 dry season irrigation of vegetables Each crop is irrigated during a specific season and using a specific water source and irrigation system Farmers choice of irrigation system tends to depend on many factors For example in the South tractorization is often a necessary precondition for rice irrigation In the North intensive irrigation of rice and vegetables may make sense only if labor is cheap whereas irrigation of sorghum and legumes is supplementary and may not affect farm households behaviors Although more rigorous studies are needed in the future observed patterns of irrigation use in Nigeria indicate that the policies aiming to raise agricultural productivity and to develop the value chains of key crops may need to be based on an understanding of why irrigation is used in specific ways in different systems and of what the key constraints in scaling up such systems in other locations are

Manual Well Drilling Investment Opportunity in Ethiopia Elizabeth Weight,Robert Yoder,Andrew Keller,2013-10-09 Increasing female and male farmers access to groundwater can contribute to increased incomes improved food security and improved access to water for livestock and domestic needs In many contexts private sector manual well drilling is a reliable and affordable means to access shallow groundwater but it is not widely available in Ethiopia Data information and mapping on pilot manual well drilling efforts in selected areas of Ethiopia indicated that the technique provided affordable access to shallow groundwater for farmers and demonstrated high demand among farmers for manually drilled wells as well as profitability for drilling businesses The authors of this paper suggest that investments in creating a spatial database of hydrogeologic suitability domains investments in driller training and associated investments in accelerating the drilling industry could catalyze a manual well drilling industry and significantly improve smallholder farmers affordable access to shallow groundwater

Providing Safe Drinking Water in Small Systems Joseph Cotruvo,Gunther F. Craun,Nancy Hearne,2019-01-15 The continued lack of access to adequate amounts of safe drinking water is one of the primary causes of infant morbidity and mortality worldwide and a serious situation which governments international agencies and private organizations are striving to alleviate Barriers to providing safe drinking water for rural areas and small communities that must be overcome include the financing and stability of small systems their operation and appropriate cost effective technologies to treat and deliver water to consumers While we know

how to technically produce safe drinking water we are not always able to achieve sustainable safe water supplies for small systems in developed and developing countries Everyone wants to move rapidly to reach the goal of universal safe drinking water because safe water is the most fundamental essential element for personal and social health and welfare Without safe water and a safe environment sustained personal economic and cultural development is impossible Often small rural systems are the last in the opportunity line Safe Drinking Water in Small Systems describes feasible technologies operating procedures management and financing opportunities to alleviate problems faced by small water systems in both developed and developing countries In addition to widely used traditional technologies this reference presents emerging technologies and non traditional approaches to water treatment management sources of energy and the delivery of safe water **NO**
